TEXTREME

GENERAL CATALOGUE 2026

MADE IN ITALY

TEXTREME

IN THE MARK OF CONTINUITY

Welcome to the TEXTREME commercial catalog – High Tech Fly Tying Materials.

Within these pages, you will find our complete range of fly tying materials and accessories, designed and manufactured in Italy, where textile expertise, technical development, and industrial control operate as a single integrated system.

Our collection includes tying threads, floss, tinsel, chenilles, long hair, braids, synthetic fibers, and technical materials, together with a selection of solutions for fly tying, tying bench organization, and fishing accessories developed under the FlyMate program.

Our experience is built on more than sixty years in the textile industry through Filtex 1965 Distribution s.a.s., an industrial heritage that gives us deep technical knowledge of natural and synthetic fibers and their transformation and dyeing processes.

A core element of our approach is full control of the production chain. From raw material and fiber selection through the various transformation stages — including dyeing — to final packaging, every step is managed with continuity and precision to ensure consistency, stability, and long-term repeatability.

Dyeing operations are carried out by long-standing specialized textile partners we have worked with for decades. This allows us to achieve technically precise, uniform, and fully repeatable colors across different production runs, a critical requirement in professional fly tying.

Alongside our materials range, we also develop accessories and technical solutions using additive manufacturing technologies introduced in 2020. This approach reduces the distance between design and finished product while maintaining full control over function, quality, and precision.
We invite you to explore the collection and experience the TEXTREME identity:
100% Designed and Manufactured in Italy

FLYMATE ECOSYSTEM

AN INTELLIGENT ECOSYSTEM DESIGNED FOR A SMOOTHER, LIGHTER, MORE ORGANIZED AND ESSENTIAL FISHING EXPERIENCE.

FlyMate Ecosystem was born from a simple yet innovative idea: to create a modular equipment system capable of adapting to the angler, their style and their specific needs.
The concept is based on Velcro as the key element for integration and customization, allowing each accessory to be added, removed and repositioned quickly and intuitively, creating a configuration that is always unique and functional.
Every angler has different habits, techniques and requirements. This is why the system offers maximum freedom of configuration, allowing each user to organize their equipment according to their fishing style, environment and operating conditions.

Every component is part of a continuously evolving ecosystem, designed to support anglers in every situation: from fast-flowing mountain streams to large rivers, from lakes to future developments dedicated to saltwater fishing.

Lightness, durability and freedom of movement are the foundations of every element, designed to provide comfort and functionality even during the most demanding fishing sessions.
Not just a collection of accessories, but an open system that grows over time. New products and solutions will be developed to expand its possibilities, following the needs, feedback and experience of the anglers who choose to become part of this project.

FlyMate Ecosystem: your system, your style, your fishing.

Developed in collaboration with PASEDA

X-POWDER

Ultra-fine Powder that adheres to the exposed surface of feathers, hairs, and synthetic fibers, providing an unparalleled buoyancy to the fly. An essential step to achieve a perfect result is treating the fly while completely dry; if wet or damp, the opposite effect occurs. It resists immersion exceptionally well; during this phase, it creates an air bubble that closely imitates the wing case during the hatching. It can be used on any type of fly: nymphs, emergers, dry flies, and streamers, allowing for experimentation by applying it to specific parts of the fly to achieve specific fishing presentations. - Convenient 2-gram bottle with a secure seal - Attach the fly to the tippet, place the cap on without pressing down, and shake well to cover the entire surface of the fly - It is sensitive to moisture; do not insert wet flies inside the bottle

CODE	DESCRIPTION	RETAIL PRICE
XP-TX	X-POWDER - White - 2 gr.	€ 10.50

TUNGSTEN STUDS

New type of studs to be used in fishing boots, both with rubber and felt soles. The studs ar made with a tungsten tip, an extremely hard metal that guarantees maximum grip on all slippery surfaces such as mud, snow, ice, rocks, grass, and roots. The special helical thread ensures anchoring to any type of rubber and felt sole, whether new or used, and with or without provision for studs insertion. - Two types of studs proposed: for felt soles and aggressive for rubber soles - The kit consists of 24 studs, a mandrel, and an ergonomic handle, and a handy instruction booklet for correct installation procedure is also included in the package - It is also possible to purchase individual studs, the mandrel, and the handle are designed to be used with both types

CODE	DESCRIPTION	RETAIL PRICE
BGT-KFL	KIT TUNGSTEN STUDS For felt sole - - Kit 24 pcs.	€ 59.60
BGT-KRBA	KIT TUNGSTEN STUDS Aggressive for rubber sole - - Kit 24 pcs.	€ 59.60

CDC-OIL POD

The CDC-Oil Pod is designed to externally carry CDC oils or floatant liquids, keeping them always easily accessible and ready to use while fishing. The containers are inserted upside down through the top opening, with the screw cap locked between the elastic strap and the container body, ensuring a secure hold while allowing quick and convenient access when needed. The integrated D-ring allows it to be suspended from the Voomerang or from any traditional fishing vest. The high-strength elastic strap securely holds containers with a diameter from 2.5 to 3.0 cm, ensuring reliable retention during movement and active fishing situations. Made with the same technical webbing used on the Voomerang, it integrates perfectly into the FlyMate ecosystem, creating a coordinated system not only from a functional point of view but also in terms of design. Features * Product dimensions: L 2.5 × D 2.5 × H 9 cm * High-strength elastic strap for outdoor use * Technical polymer D-ring for suspension attachment * Compatible with the Voomerang, fishing vests, and similar systems * Made with the same materials as the Voomerang for perfect integration into the FlyMate ecosystem

CODE	DESCRIPTION	RETAIL PRICE
COP-BLK	CDC-OIL POD One Size - Black - 1 pcs.	€ 15.00

COMBO PATCH-DRY-FLOATANT & CDC OIL

The Combo Patch is a compact and modular accessory that combines a holder for fly drying and floatant powders with a holder for CDC oil or floatant bottles, integrated on a technical fabric base with a male Velcro backing. The rear Velcro attachment allows it to be mounted on our FlyMate units or on any other surface equipped with female Velcro, providing a customizable setup according to the angler's needs. It can also be used in suspension thanks to the supplied Split Ring, which can be inserted into the dedicated upper loop. In addition, the two integrated D-rings allow further accessories to be attached, increasing the configuration possibilities of the fishing setup. The elastic strap securely holds powder containers with a diameter from 3.5 to 4.5 cm, matching the most common sizes available on the market. Made with the same technical fabric and webbing used on the Voomerang, it integrates perfectly into the FlyMate ecosystem, creating a coordinated system not only from a functional point of view but also in terms of design. Features * Product dimensions: L 8.5 × H 8.5 cm * Technical fabric base with male Velcro backing * Can be used in suspension with the supplied Split Ring * High-strength elastic straps for outdoor use * Two metal D-rings for attaching additional accessories * Made with the same materials as the Voomerang for perfect integration into the FlyMate ecosystem

CODE	DESCRIPTION	RETAIL PRICE
CPDFCO-GRY	COMBO PATCH-DRY-FLOATANT + CDC OIL One Size - Gray - 1 pcs.	€ 22.00

DRY-FLOATANT POD

The Dry-Floatant Pod is designed to externally carry powder containers used for fly treatment, keeping them always easily accessible while fishing. The integrated D-ring allows it to be suspended from the Voomerang or from any traditional fishing vest. The elastic strap securely holds powder containers with a diameter from 3.5 to 4.5 cm, matching the most common sizes available on the market. Made with the same technical webbing used on the Voomerang, it integrates perfectly into the FlyMate ecosystem, creating a coordinated system not only from a functional point of view but also in terms of design. Features * Product dimensions: L 4 × D 4 × H 10 cm * High-strength elastic strap for outdoor use * Stainless steel D-ring for suspension attachment * Compatible with the Voomerang, fishing vests, and similar systems * Made with the same materials as the Voomerang for perfect integration into the FlyMate ecosystem

CODE	DESCRIPTION	RETAIL PRICE
DFP-BLK	DRY-FLOATANT POD One Size - Black - 1 pcs.	€ 15.00

FLY PATCH 105

Fly Patch 105 is designed to hold bulky flies, such as large dry flies, terrestrials, and nymphs. Made from 5 mm thick white technical foam, it allows flies with bulky hackles to be stored while keeping the materials raised from the base. The specific density of the material ensures secure fly retention while maintaining its shape and performance over time. The green-colored support base provides excellent visual contrast, even with naturally colored flies. The special retaining edges ensure a secure hold, even for heavier flies positioned in the outer slots, where structural stress is usually higher. Package contents * Product dimensions: H 13 × W 7.5 cm * Package dimensions: H 13 × W 10 cm * 5 sections with a total of 105 fly slots * 5 mm thick white technical foam with retaining edges, ensuring secure fly retention and excellent fly visibility

CODE	DESCRIPTION	RETAIL PRICE
FP105-GRN	FLY PATCH 105 105 Fly Slots - Green - 1 pcs.	€ 12.90

FLY PATCH 132

The Fly Patch 132 is the standard model of the FlyMate system. Made from 5 mm thick white technical foam, it is designed to hold small and medium-sized flies. The specific density of the material ensures a secure grip, even for the smallest flies, while maintaining its original performance characteristics over time. The white color of both the foam and the underlying support base provides maximum visual contrast, enhancing the visibility of natural-colored flies such as grey, olive, and brown, which are often more difficult to spot. Package contents * Product dimensions: H 13 × W 7.5 cm * Package dimensions: H 13 × W 10 cm * 6 sections with a total of 132 fly slots * 5 mm thick white technical foam with a perimeter retaining frame, ensuring secure fly retention and excellent fly visibility

CODE	DESCRIPTION	RETAIL PRICE
FP132-WHT	FLY PATCH 132 132 Fly Slots - White - 1 pcs.	€ 14.90

FLY PATCH 84

The Fly Patch 84 is designed to hold bulky flies with bodies extending towards the rear, such as small streamers, worms, Woolly Buggers, and boobies. Made from 5 mm thick white technical foam, it keeps the fly bodies raised from the base, preventing compression of the more voluminous materials. The specific density of the material ensures secure fly retention while maintaining its original characteristics over time. The blue support base provides excellent visual contrast, even with naturally colored flies. The special retaining edges ensure optimal fly retention, including for heavier flies positioned in the outermost slots, where structural stress is normally higher. Package contents * Product dimensions: H 13 × W 7.5 cm * Package dimensions: H 13 × W 10 cm * 4 sections with a total of 84 fly slots * 5 mm thick white technical foam with retaining edges, ensuring secure fly retention and excellent fly visibility

CODE	DESCRIPTION	RETAIL PRICE
FP84-BLU	FLY PATCH 84 84 Fly Slots - Blue - 1 pcs.	€ 11.90

FLYMATE DUO

FlyMate Duo is the most compact model in the FlyMate range. It is designed as a chest pack featuring interchangeable Fly Patch inserts, to be mounted on the Voomerang or similar systems using four D-rings inserted into tear-resistant PVC supports, secured to the shell with through rivets. Alternatively, it can be mounted on other chest packs, such as the FlyMate Quattro, equipped with a Velcro system, by using the rear male Velcro plate, which can be installed in place of the D-rings using the same rivets. The reinforced structure is designed to withstand the most demanding conditions of stream fishing. Two powerful neodymium magnets prevent accidental opening during jumps, wading, or sudden movements, while still allowing one-handed operation. The FlyMate Duo is supplied with two white 5 mm technical foam Fly Patch inserts, each featuring 132 slots for small and medium-sized flies, providing a total capacity of 264 flies. Package contents * 2 white Fly Patch inserts with 132 slots each * 5 male/female rivets in burnished brass (1 spare pair) * 5 tear-resistant PVC supports for D-rings (1 spare) * 5 steel D-rings with black finish (1 spare) * 1 rear male Velcro plate for attachment to Velcro-compatible systems * 1 technical neoprene pad with rear Velcro for fly changing and drying Main features * Product dimensions: H 9.5 × W 14.5 × D 3.7 cm * Package dimensions: H 9.8 × W 14.4 × D 4.1 cm * Made from 100% recyclable polyethylene * Two-neodymium-magnet closure system, calibrated to allow one-handed opening while maintaining a secure closure * Reinforced structure, resistant to impacts and stresses typical of fishing conditions * Shell with differentiated thickness: the side facing the angler is thinner to improve fly visibility, while the outer side is thicker to reduce the risk of accidental fly loss during handling * The closure magnets also act as a practical temporary fly holder while changing flies * Interchangeable Fly Patch inserts, compatible with FlyMate Quattro and FlyMate Rack * Dual attachment system: via D-rings or through the included rear Velcro plate * Front Velcro surface for attaching additional modules and accessories

CODE	DESCRIPTION	RETAIL PRICE
FMD-GRY	FLYMATE DUO 2 Patches - Gray - 1 pcs.	€ 65.90

FLYMATE QUATTRO

FlyMate Quattro is the largest capacity model in the FlyMate range. It is designed as a chest pack featuring interchangeable Fly Patch inserts, to be mounted on the Voomerang or similar systems using four D-rings inserted into tear-resistant PVC supports, secured to the shell with through rivets. Alternatively, it can be mounted on other chest packs equipped with a Velcro system by using the rear male Velcro plate, which can be installed in place of the D-rings using the same rivets. The reinforced structure is designed to withstand the most demanding conditions of stream fishing. Three powerful neodymium magnets prevent accidental opening during jumps, wading, or sudden movements, while still allowing one-handed operation. The FlyMate Quattro is supplied with four interchangeable Fly Patch inserts made from 5 mm white technical foam: * 2 white Fly Patch inserts with 132 slots each, for small and medium-sized flies * 1 green Fly Patch insert with 105 slots, for medium and large-sized flies * 1 blue Fly Patch insert with 84 slots, for large-sized flies Total: 453 fly slots Package contents * 2 white Fly Patch inserts with 132 slots * 1 green Fly Patch insert with 105 slots for bulky flies * 1 blue Fly Patch insert with 84 slots for small streamers, worms, and boobies * 5 male/female rivets in burnished brass (1 spare pair) * 5 tear-resistant PVC supports for D-rings (1 spare) * 5 steel D-rings with black finish (1 spare) * 1 rear male Velcro plate for attachment to Velcro-compatible systems Main features * Product dimensions: H 18 × W 14.5 × D 4 cm * Package dimensions: H 18.2 × W 14.6 × D 4.3 cm * Made from 100% recyclable polyethylene * Three-neodymium-magnet closure system, calibrated to allow one-handed opening while maintaining a secure closure * Reinforced structure, resistant to impacts and stresses typical of fishing conditions * Shell with differentiated thickness: the side facing the angler is thinner to improve fly visibility, while the outer side is thicker to reduce the risk of accidental fly loss during handling * The closure magnets also act as a practical temporary fly holder while changing flies * Interchangeable Fly Patch inserts, compatible with FlyMate Duo and FlyMate Rack * Dual attachment system: via D-rings or through the included rear Velcro plate * Large front Velcro area for attaching additional modules and accessories

FLYMATE RACK

The FlyMate Rack is the ideal companion for FlyMate Duo and FlyMate Quattro, designed to organize and store additional Fly Patch inserts. It can hold up to 4 Fly Patch inserts in the three available sizes (132, 105, and 84 slots), already equipped with flies, providing a practical, cost-effective, and functional storage solution. It allows quick access to Fly Patch inserts prepared before each fishing session, making it easy to install them on the FlyMate units according to the fishing conditions and specific needs of the moment. An essential accessory for anglers who want to stay organized and always ready to face any situation. Package contents * Product dimensions: H 14 × W 5.8 × D 9.1 cm * Package dimensions: H 14.5 × W 5.9 × D 9.3 cm * Lid closure with neodymium magnet * 5 wide guides for 132-slot Fly Patch inserts * 4 narrow guides for 105- and 84-slot Fly Patch inserts * Compact and durable design

LEADER DOCK

The Leader Dock is a compact plate with a male Velcro base, designed to manage and organize leaders (tapered leaders), with or without flies attached. It is supplied with two high-density foam spools featuring a V-shaped perimeter profile, which keeps leaders neatly wound and easily accessible. Its dimensions are designed to allow positioning in front of one of our Tippet Units, keeping tippet and leaders organized in a single system. It can also be mounted on any available female Velcro surface (Velcro Pad, FlyMate, etc.). The spools feature four through-holes created in the flat section by die-cutting, which can be used to secure the beginning and end of each leader. To make leader attachment even easier and more secure, four numbered rigid polyethylene mushroom-head pins (1 to 4) are also supplied, interchangeable with the foam pins. Package contents * Product dimensions: L 5 × D 5 × H 2.2 cm * Package dimensions: H 9 × W 6.7 cm * 2 technical foam spools with die-cut through-holes for leader attachment * 4 additional rigid polyethylene mushroom-head pins, numbered 1 to 4 and interchangeable with the foam pins

CODE	DESCRIPTION	RETAIL PRICE
LRD-BLK	LEADER DOCK 2 Reels - Black - 1 pcs.	€ 11.50

LEADER PATCH 4

The Leader Patch 4 is a plate compatible with the internal mounting system of our FlyMate units, designed to store and organize leaders (tapered leaders), with or without flies attached. It is supplied with four high-density foam spools featuring a V-shaped perimeter profile, which keeps leaders neatly wound and easily accessible. The spools feature four through-holes created in the flat section by die-cutting, which can be used to secure the beginning and end of each leader. To make leader attachment even easier and more secure, two complete sets of numbered rigid polyethylene mushroom-head pins (1 to 4) are also supplied, interchangeable with the foam pins. Package contents * Product dimensions: H 13 × W 7.5 cm * Package dimensions: H 13 × W 10 cm * 4 technical foam spools with die-cut through-holes for leader attachment * 2 complete sets of additional rigid polyethylene mushroom-head pins, numbered 1 to 4 and interchangeable with the foam pins

CODE	DESCRIPTION	RETAIL PRICE
LRP4-GRY	LEADER PATCH 4 4 Reels - Gray - 1 pcs.	€ 14.50

SIDE NET HOLDER

The Side Net Holder is an accessory designed to attach the landing net on the side, keeping it easily accessible at all times while fishing. Thanks to its two through rivets, it can be easily and securely installed on thin webbing straps, such as those used on the Voomerang Back Strap, or on wader belts, including the wider models available on the market. It can also be used as an elegant key holder, offering an alternative application beyond its primary function. Made with the same technical fabric and webbing materials used on the Voomerang, it integrates perfectly into the FlyMate ecosystem, creating a coordinated system not only from a functional point of view but also in terms of design. The robust construction and technical materials ensure reliability and durability even in typical stream fishing conditions. Features * Product dimensions: H 9.5 × W 3.0 cm * Package dimensions: H 6.5 × W 6.7 cm * Compatible with webbing straps and belts of different sizes, from 10 mm up to 4 cm * Technical polymer D-ring (non-metallic), preventing interference or accidental attachment with the landing net magnet * Made with the same technical materials as the Voomerang for perfect integration into the FlyMate ecosystem

CODE	DESCRIPTION	RETAIL PRICE
SNH-GRY	SIDE NET HOLDER One Size - Gray - 1 pcs.	€ 11.50

TIPPET UNIT

The Tippet Unit is designed to hold and protect a single tippet spool during fishing. The line exits through one of the two side openings reinforced with brass rivets, making the system practical for intensive use and quick tippet changes. Made from technical PVC with a textured inner surface, it provides controlled line dispensing while keeping the tippet ready for immediate use throughout fishing sessions. Thanks to the male and female Velcro system on both sides, multiple Tippet Units can be connected in sequence to create a modular system with all the tippet sizes required. Individual units can also be attached to Velcro-compatible surfaces, such as the Velcro Pad or FlyMate system, keeping the tippet easily accessible. Alternatively, the Tippet Unit can be suspended using the supplied Split Ring, inserted into the dedicated PVC loop. Features * Capacity: 1 tippet spool * Product dimensions: 9.5 × 9.5 cm * Package dimensions: H 13 × W 10 cm * Weather-resistant, ideal for protecting the tippet spool * Strong and durable construction * Two line exit openings reinforced with brass rivets for increased durability and smooth line dispensing * Male and female Velcro on both sides for connecting multiple Tippet Units together * Dual attachment system: via Velcro or suspended using the Split Ring * Velcro closure for the spool compartment with PVC pull tabs, allowing easy opening even with wet hands or while wearing gloves

CODE	DESCRIPTION	RETAIL PRICE
TTU-BLK	TIPPET UNIT One Size - Black - 1 pcs.	€ 23.50

ULTRA PATCH-DOUBLE DRY-FLOATANT & CDC OIL

The Ultra Patch is a compact and modular accessory that combines two holders for fly drying and floatant powder containers and one holder for CDC oil or floatant bottles, integrated on a technical fabric base with a male Velcro backing. The rear Velcro attachment allows it to be mounted on our FlyMate units or on any other surface equipped with female Velcro, allowing the angler to configure their fishing setup according to the specific needs of each situation. It can also be used in suspension thanks to the supplied Split Ring, which can be inserted into the dedicated upper loop. The high-strength elastic straps securely hold powder containers with a diameter from 3.5 to 4.5 cm, matching the most common sizes available on the market. In addition, the two integrated D-rings allow further accessories to be attached, increasing the customization options of the fishing system. Made with the same technical fabric and webbing used on the Voomerang, it integrates perfectly into the FlyMate ecosystem, creating a coordinated system not only from a functional point of view but also in terms of design. Features * Product dimensions: L 13 × D 4 × H 8 cm * Technical fabric base with male Velcro backing * Can be used in suspension with the supplied Split Ring * High-strength elastic straps for outdoor use * Two metal D-rings for attaching additional accessories * Made with the same materials as the Voomerang for perfect integration into the FlyMate ecosystem

CODE	DESCRIPTION	RETAIL PRICE
UPDDFCO-GRY	ULTRA PATCH-DOUBLE DRY-FLOATANT + CDC OIL One Size - Gray - 1 pcs.	€ 26.00

VELCRO PAD

The Velcro Pad is designed to transform any shoulder strap or webbing into an additional Velcro surface for attaching compatible accessories. It is ideal for expanding the configuration options of the FlyMate system, but it can also be used independently on a wide range of fishing equipment: Voomerang shoulder straps, chest packs, fishing vests, wader suspenders and belts, as well as the shoulder straps of lake fishing bags. Installation is simple and immediate: it wraps around the desired strap and closes using the integrated Velcro fastening system, providing a secure attachment without requiring any modification to the equipment. Made from technical PVC mesh fabric, it is resistant to water, weather conditions, and abrasion, and is designed to provide reliable performance and long-lasting durability even in demanding environments. The Velcro surface allows accessories and modules to be quickly positioned and repositioned according to the angler's needs, keeping them always within easy reach while fishing. Features * Product dimensions: H 16 × W 8 cm * Package dimensions: H 15.5 × W 10 cm * Large Velcro surface for attaching compatible accessories * Two side D-rings for attaching tools and various accessories * Two side PVC loops for attaching pliers, nippers, or eyeglass temples * Universal attachment system using a wrap-around Velcro strap * Technical PVC mesh construction resistant to water, weather conditions, and abrasion

CODE	DESCRIPTION	RETAIL PRICE
VOP-BLK	VELCRO PAD One Size - Black - 1 pcs.	€ 21.50

VOOMERANG

The Voomerang is an ergonomic V-shaped collar designed to support FlyMate units or other chest packs. Thanks to its highly ergonomic design, it perfectly follows the shape of the neck and shoulders, evenly distributing the weight of FlyMate units or other chest packs positioned at the front, as well as the weight of the rear-mounted landing net. The specific V-shaped design helps distribute the load evenly across the shoulders, reducing pressure on the neck and improving comfort during extended fishing sessions. At the same time, it keeps front-mounted equipment stable and easily accessible, preventing unwanted movement while fishing, walking, or wading. Made from hydrophobic technical fabric, it is ultra-lightweight, durable, and designed for extended outdoor use. Combined with the **Voomerang Back Strap**, it creates a four-point attachment system for our FlyMate units or other chest packs. Features * Dimensions: H 40 × W 25 cm (when worn) * Four front burnished brass snap hooks, adjustable in length, to secure FlyMate units or other chest packs at the desired height * Eight D-rings on the shoulder straps for attaching fishing accessories (pliers, nippers, etc.) * Two PVC loops positioned near the front D-rings for attaching pliers, nippers, or eyeglass temples * Two technical polymer D-rings positioned behind the neck, allowing the landing net to be secured at two different heights and providing attachment points for the Voomerang Back Strap * Two hidden pockets (not waterproof), located under the shoulder straps, ideal for storing pens, fishing permits, competition cards, or other small accessories

CODE	DESCRIPTION	RETAIL PRICE
VMG-GRY	VOOMERANG One Size - Gray - 1 pcs.	€ 92.50

VOOMERANG BACK STRAP

The Voomerang Back Strap is a rear shoulder strap system designed to be connected to the Voomerang or similar systems equipped with a rear D-ring positioned behind the neck. It adds two additional front attachment points for FlyMate units or other chest packs, creating a four-point support system that improves stability and weight distribution. Made from high-quality webbing, it incorporates elastic side sections that provide outstanding comfort and excellent adaptability to the body. Once adjusted to the angler's body, it automatically accommodates additional layers of clothing, such as waterproof or insulated jackets, without requiring further adjustment. Features * Fully adjustable in length and width to fit any body shape * High-quality burnished brass snap hooks * Two elastic side sections for optimal adaptability, even when wearing additional clothing layers * Balanced weight distribution and improved chest pack stability while fishing, walking, and wading * Compatible with the Voomerang and similar systems equipped with a rear D-ring

CODE	DESCRIPTION	RETAIL PRICE
VBS-BLK	VOOMERANG BACK STRAP One Size - Black - 1 pcs.	€ 28.50

POWER SOX

Innovative and unique technical socks, protective and anti-abrasive, designed to be worn over neoprene wader boots. Virtually indestructible, externally woven with our TeXtreme Power Thread yarn, thanks to their extremely high resistance to friction and tearing, they create a protective barrier for the neoprene boots of your waders, drastically reducing wear and tear and subsequent puncture. The interior is made of technical Polyamide for optimal fit and adherence to neoprene boots. They resist both UV rays and saltwater, make it easier to put on boots thanks to their smooth and slippery surface, and provide an effective protective barrier even when wearing fins for fishing in a belly boat. - Handcrafted in Italy - Any aesthetic defects do not compromise functionality - Tested in the most extreme conditions of use - Metallic gray/black color - Two sizes available: S/M from 38 to 42 and L/LX from 43 to 48 - They do not increase the size of the wader foot, thickness equivalent to a normal cotton sock - Packaging dimensions: L139xW90xH13 mm.

CODE	DESCRIPTION	RETAIL PRICE
PSX-LXL	POWER SOX Large-Extra Large - Metallic Gray - 1 pair	€ 25.50
PSX-SM	POWER SOX Small-Medium - Metallic Gray - 1 pair	€ 25.50

SNAP SPOOL

The Snap Spool with movable thread-locking flange is a proprietary TEXTREME solution specifically developed for our fly tying threads.

The movable flange system keeps the thread end always accessible during tying sessions, preventing accidental unwinding inside bags, drawers, or spool storage systems.

The flange surfaces are designed to ensure controlled thread movement, reducing unwanted friction and preventing snagging, fraying, or breakage during use.

Each Snap Spool is supplied with the thread already positioned in the movable flange, ready for immediate use. At the end of use, we recommend repositioning the thread in its dedicated slot, ensuring it is always correctly arranged for the next session.

The Snap Spool has been designed and tested to ensure maximum compatibility with the majority of bobbin holders available on the market, from older models to the latest-generation ones, allowing the fly tyer to freely use their preferred tool without any functional limitations.

THE SPOOL PLAN

The Spool Plan program has been developed to meet the operational needs of retailers and distributors. It is an integrated merchandising system that combines modular storage and display solutions for our Snap Spool, designed to simplify product management, optimize logistics costs, and enhance the presentation of the assortment at the point of sale.

BOX12

Box12 is designed to maximize the storage efficiency of Snap Spool.
It enables an orderly and functional management of the product, facilitating access and speeding up restocking operations.

SPOOL CARD

The Spool Card, supplied integrated within our Box12, is designed for displaying single Snap Spool on wall-mounted hook systems.
It is made with a minimal use of recyclable plastic and designed to ensure functionality, sustainability, and maximum product visibility.

SPOOL CLIP

The six-position Spool Clip allows Snap Spool to be displayed on wall-mounted hook systems. This solution expands the display possibilities of the product and increases its visual impact within the point of sale.

THREAD DISPLAY

The Thread Display is made of durable transparent acrylic and is designed for countertop, table, or display window use. Its compact design allows a high number of Snap Spool to be displayed while occupying minimal space, ensuring excellent readability of the assortment and available colors.

BOX18

The Box18 is designed to protect, organize, and transport up to 18 Snap Spool and small components within a single modular system. It enables an orderly and versatile management of the product, facilitating transport, kit assembly, and the professional presentation of products.

BOX12

The Box12 is a transparent packaging system with a base-and-lid structure, designed to hold 12 Snap Spool in a vertical position.

It is used as the standard packaging unit for our Snap Spool and has been developed to optimize space throughout the entire supply chain, from warehouse to point of sale.

Its compact design reduces the volume occupied during transport and storage, contributing to lower shipping costs and more efficient inventory management.

With the introduction of the Spool Card, integrated directly within the packaging, the Box12 is fully integrated into major warehouse and retail management systems, supporting both logistics operations and in-store display.

The external label with EAN-13 code enables immediate scanner identification, simplifying receiving, inventory, and restocking operations.
The vertical arrangement of the Snap Spool allows immediate recognition of thread color, improving selection speed both in warehouses and at the point of sale.

The Box12 is not a simple package, but a logistics unit designed to ensure operational efficiency, space optimization, and continuity in product management throughout the entire supply chain..

SPOOL CARD

The Spool Card is a single-unit display solution designed for wall-mounted retail systems. Developed in-house using 3D printing technology, it allows Snap Spools to be displayed on standard pegboard systems with Euro Hole hooks, commonly used for blister-pack retail products.

This allows the Snap Spool to be displayed using existing in-store infrastructure, without the need for any structural modifications.

The Spool Card completes the Snap Spool ecosystem together with Box12, Spool Clip, Thread Display, and Box18, covering the single-unit sales segment and optimizing product visibility at the point of sale.

It is made of lightweight, flexible, and recyclable plastic and features a product label consistent with the one applied to the Snap Spool.
The grid structure facilitates label separation and allows for simplified disposal at end of life.

SPOOL CLIP

The Spool Clip is a six-position display system for our Snap Spool, developed in-house using 3D printing technologies and designed for wall-mounted retail hook systems.
In case of space constraints, the Spool Clip can be shortened by removing one or more hooks through cutting at the base of the stem, until the desired length is achieved.

It allows the multiple display of Snap Spool within a single unit, increasing display density and improving product visibility on the wall.

The refined, slightly flexible “C-shaped” structure ensures proper retention of the Snap Spools and preserves their integrity regardless of the type of thread used, including more delicate filaments.

Made from recyclable plastic, the Spool Clip is designed as a controlled life-cycle solution and can be disposed of through sorted waste collection in accordance with local regulations.

Made from recyclable plastic, the Spool Clip is highly sustainable as it can be easily disposed of through the recycling collection system.

THREAD DISPLAY

The Thread Display is a high-capacity retail display system designed for structured and efficient presentation of Snap Spools at the point of sale. Recently redesigned for flat-pack shipping and on-site assembly, it significantly reduces transport volume while improving protection during transit.

Made of high-quality transparent acrylic, it is engineered to maximize product visibility, simplify handling, and optimize retail space utilization. The external dimensions of 36 × 31 × 41 cm support a capacity of up to 432 Snap Spools, arranged on 4 shelves with 9 lanes each, holding 12 units per lane. The system is modular and stackable: two units can be stacked to double display capacity to 864 Snap Spools, secured with four through bolts.

Designed for operational flexibility, loading can be performed from both front and rear access points, allowing use either as a counter display with direct access or as a wall-positioned unit, adapting to different retail layouts.

BOX18

The Box18 is a multi-purpose containment system made of high-impact semi-transparent plastic, designed to hold 18 Snap Spools in a horizontal position.

The lid, featuring a dual integrated hinge system, provides a stable and secure closure, making it suitable for transport and handling of Snap Spools.

The structure is engineered to prevent accidental opening and ensure content protection during shipping and operational use. Thanks to its versatile configuration, the Box18 can also be used as a sample case for agents and sales representatives, offering a clear and accessible presentation of the product range.

It is also suitable for building tying kits and organizing small components such as accessories, beads, hooks, and flies, ensuring structured and modular storage.

The locking system ensures an effective seal of internal compartments, preventing leakage of even the smallest components and guaranteeing safe handling during transport and daily use.

DOUBLE THREAD

Extremely fine 30 denier polyamide monofilament, presented as a double-strand spool. By utilizing both strands, creating loops becomes effortless: separate and then twist them with the help of a dubbing twister. Using the single monofilament is excellent for tying flies of the tiniest dimensions and for invisible ribbings. - 100 meter spool - 30x2 Denier

CODE	DESCRIPTION	RETAIL PRICE
SDT-01	DOUBLE THREAD 30x2 Den. - 01-Light Olive - 100 mt.	€ 2.35

FLAT WAXED NYLON

Building on Danville's renowned classic thread and combining our over 60 years of experience in textile fibers and dyeing, we have reintroduced Flat Waxed Nylon, preserving its distinctive characteristics while expanding its color range. Flat Waxed Nylon is a high-tenacity tying thread composed of nearly parallel filaments, making it lie very flat on the hook, provided that the twists formed during wrapping are released. Thanks to this feature, it allows for the creation of very uniform bodies. It is perfect for tying large flies, both for saltwater and freshwater, and is also excellent for tying large flies using natural materials, allowing you to tightly tie hair and hackles without cutting them. - 100-meter spool - 210 Denier thread size

FLOSS

Semitexturized 210 Denier thread with an excellent strength, it lays quite flat and it allows to tie slim and uniform bodies. It is suitable for tying bodies, both for traditional flies and nymphs, allowing for a smooth profile, taking care not to twist the thread during winding. Highly used for nymph collars and spots, it is particularly useful for posts and tails. - 100 meter spool - 210 Denier

FLYMASTER 6/0

Building on Danville's renowned classic thread and combining our over 60 years of experience in textile fibers and dyeing, we have reintroduced Flymaster 6/0, preserving its distinctive characteristics while expanding its color range. Flymaster 6/0 is a very popular all-around tying thread on the market. Composed of high-tenacity fibers, it is well-suited for creating uniform bodies without adding excessive bulk. It is ideal for medium-sized nymphs and dry flies, approximately up to size #14. It is also excellent for tying small freshwater streamers. - 200-meter spool - 100 Denier thread size - Size 6/0

CODE	DESCRIPTION	RETAIL PRICE

MICRO FLOSS

With a size of 110 Denier, it is slightly thinner than PolyFloss Small, but the real difference lies in the fact that it is a semi-textured yarn, so less elastic and puffy than the previous one. This makes it suitable for tying heads and less bulky bodies, particularly on small hooks. Commonly used for collars and spots on nymphs, it finds excellent application especially in posts and tails. - 100 meter spool - 110 Denier size

CODE	DESCRIPTION	RETAIL PRICE

MIDGE THREAD

It is the latest Floss thread born in chronological order but rapidly rising in terms of appreciation by enthusiasts. The Midge Thread is a 75 Denier, and is in fact the thinnest yarn in the Floss family, available in a new range of colors, recently presented. It allows you to tie dressing using it just like any other classic tying thread, without having to replace it with thinner ones in some delicate steps, such as the closing knot. Perfect also as a smooth base for wrapping natural and synthetic quills and biots. Ideal for chironomids, it is also excellent for nymphs, perdigons, wet and dry flies ranging from size 16 to 22. - New range of 36 colors, including 7 fluorescent ones - 100 meter spool - 75 Denier size

SMT-36	MIDGE THREAD 75 Den. - 36-Fluo Chartreuse - 100 mt.	€ 2,70

MONO THREAD 0.10

Transparent monofilament, suitable for tying flies with translucent bodies where the thread must not cover the natural material used, such as some special CDC dressings. Also great for making small baitfish imitating the fodder both in saltwater and freshwater fishing. This size is suggested for hooks from #16 to #22. - 100 meters spool - Size 0.10 mm.

CODE	DESCRIPTION	RETAIL PRICE
SMTS-01	MONO THREAD SM 0/10 - 01-Clear - 100 mt.	€ 2,30

MONO THREAD 0.14

Transparent monofilament, indicated for tying flies with translucent bodies where the thread must not cover the natural material used, such as some specific CDC dressings. Also excellent for making small baitfish imitating forage both in sea and fresh water fishing. This size is suggested for hooks from #10 to #16. - 100 meter spool - Size 0.14 mm.

CODE	DESCRIPTION	RETAIL PRICE
SMTM-01	MONO THREAD MD 0/14 - 01-Clear - 100 mt.	€ 2,30

MONO THREAD 0.18

Transparent monofilament, suitable for tying flies with translucent bodies where the thread must not cover the natural material used, such as some specific CDC dressing. Also great for creating small baitfish imitating forage, both in saltwater and freshwater fishing. This size is recommended for hooks from #6 to #10. - 100 meter spool - Size 0.18 mm.

CODE	DESCRIPTION	RETAIL PRICE
SMTL-01	MONO THREAD LG 0/18 - 01-Clear - 100 mt.	€ 2.30

PHOSPHO FLOSS

Semitexturized thread, similar to Microfloss, loaded with phosphorescent pigments that react to ultraviolet light (both sunlight and artificial). It is particularly suitable for tying bodies or ribbing, but can also be used for tags or posts in parachutes, especially for those light conditions where this thread gives exceptional results, thanks to its phosphorescent properties that allow you to always spot the fly in the water. Exceptional for capturing the fish's attention, especially in low-light conditions, and as an alternative to classic flosses threads. - 50 meter spool - 130 Denier

CODE	DESCRIPTION	RETAIL PRICE
SFFL-01	PHOSPHO FLOSS 130 Den. - 01-White - 50 mt.	€ 2.70
SFFL-02	PHOSPHO FLOSS 130 Den. - 02-Turquoise - 50 mt.	€ 2.70
SFFL-03	PHOSPHO FLOSS 130 Den. - 03-Blue - 50 mt.	€ 2.70

SFFL-05	PHOSPHO FLOSS 130 Den. - 05-Lilac - 50 mt.	€ 2.70
SFFL-06	PHOSPHO FLOSS 130 Den. - 06-Yellow - 50 mt.	€ 2.70

POLYFLOSS

Shiny textured yarn, suitable for filling medium to large-sized hooks and ideal for bodies and underbodies of various types of dressing. Highly elastic and durable, it comes in a wide range of colors to meet diverse needs. When tied on the hook, it lays down very smoothly and uniformly, but it's important to release the twist that forms during use with a bobbin holder. It can also be used as thread for ribbing by manually twisting it before wrapping. - 50 meter spool - 280 Denier

POWER THREAD EXTREME

Extreme is the thinnest tying thread ever created, which allows you to surpass current limits in the world of fly tying. Made with a high-strength polymer in relation to its diameter, up to ten times stronger than steel of the same diameter, it is suitable for tying flies where a practically invisible thread with excellent strength is needed. A versatile thread that covers a wide range of uses, from creating smooth and uniform bodies and thoraxes on tiny hooks up to #32, to tying in dubbing loops where the thread remains practically invisible, and in all fly tying situations where the thread must not be invasive. Available in both black (a solid color that does not fade during use) and natural white, which can be easily colored with a permanent marker. Recommended for very small flies and when a loop needs to be created without opening the thread with a half-hitched needle, its size allows for the creation of practically invisible loops, comparable to those obtained by dividing a 25 denier Power Thread Micro. - 100 meter spool - 10 Denier - Breaking strain of 0.44 kg. - Recommended for hooks from #20 to #32 - Use of a bobbin with a ceramic tip is recommended

CODE	DESCRIPTION	RETAIL PRICE
SPTEX-01	POWER THREAD EXTREME 10 Den. - 01-White - 100 mt.	€ 5.98
SPTEX-02	POWER THREAD EXTREME 10 Den. - 02-Black - 100 mt.	€ 5.98

POWER THREAD LARGE

Technical polymer with an extremely high breaking load in relation to its diameter, up to ten times higher than steel of the same diameter, suitable for tying large streamers where an practically indestructible thread is needed for any type of operation, both for covering and closing. Thanks to its calibrated twist, the fibers remain well joined but still lay down very flat and smooth, creating very uniform and seamless underbodies and heads. Available in both solid black (color that does not fade during use) and natural white, which can be easily colored with a permanent marker. Perfect for pike flies and large flies when strength needs to go hand in hand with the filling properties of the yarn. Being a very slippery polymer, it is recommended to use it in conjunction with cyanoacrylate glue before crucial steps of the fly tying. - 100 meter spool - 150 Denier - Breaking strain of 5.60 kg. - Use of a bobbin with a ceramic tip is recommended

CODE	DESCRIPTION	RETAIL PRICE
SPTLG-01	POWER THREAD LARGE 150 Den. - 01-White - 100 mt.	€ 3.98
SPTLG-02	POWER THREAD LARGE 150 Den. - 02-Black - 100 mt.	€ 3.98

POWER THREAD MEDIUM

Technical polymer with a very high breaking strength in relation to its diameter, up to ten times higher than steel of the same diameter, suitable for tying medium and large-sized flies where a very strong yet non-invasive thread is required. Thanks to its calibrated twist, the fibers remain well bonded but still lay very flat and smooth, creating very uniform and stepless underbodies and heads. Available in red, black (solid colors that do not fade during use), and natural white that can be easily colored with a permanent marker. Perfect for medium to large-sized flies when strength needs to go hand in hand with the filling properties of the thread. As it is a very slippery polymer, it is recommended to use it in combination with cyanoacrylate glue before crucial steps of the fly tying process. - 100 meter spool - 100 Denier - Breaking strain of 3.80 kg. - Use of a bobbin with a ceramic tip is recommended

CODE	DESCRIPTION	RETAIL PRICE
SPTME-01	POWER THREAD MEDIUM 100 Den. - 01-White - 100 mt.	€ 4.25
SPTME-02	POWER THREAD MEDIUM 100 Den. - 02-Black - 100 mt.	€ 4.25
SPTME-03	POWER THREAD MEDIUM 100 Den. - 03-Red - 100 mt.	€ 4.25

POWER THREAD MICRO

Technical polymer with a very high breaking load in relation to its diameter, up to ten times higher than a steel of the same diameter, suitable for tying flies where a very resistant yet thin thread is needed. Versatile thread that covers a wide range of uses, from creating smooth and uniform underbodies, to tying with difficult hairs like elk and deer, to the possibility of splitting it for loop-style ties without doubling the thread. Available in both black (a solid color that does not fade during use) and natural white, which can be easily colored with a permanent marker. It is a universal thread that provides great strength and a perfect size for creating many types of dry flies and nymphs in medium-small hook sizes. - 100 meter spool - 25 Denier - Breaking strain of 1.10 kg. - Recommended for hooks from #16 to #22 - Use of a bobbin with a ceramic tip is recommended

CODE	DESCRIPTION	RETAIL PRICE
SPTMI-01	POWER THREAD MICRO 25 Den. - 01-White - 100 mt.	€ 5.10
SPTMI-02	POWER THREAD MICRO 25 Den. - 02-Black - 100 mt.	€ 5.10

POWER THREAD SMALL

Technical polymer with a very high breaking load in relation to its diameter, up to ten times higher than a steel of the same diameter, suitable for tying flies where a very resistant yet thin thread is needed. Versatile thread that covers a wide range of uses, from smooth and uniform underbodies, to tying difficult materials such as elk and deer hair, to the possibility of splitting it for loop-style tying without the need for doubling the thread. Available in both black (a solid color that does not fade during use) and natural white color that can be easily colored with a waterproof permanent marker. Its size makes it suitable for tying underbodies on medium-sized hooks and small streamers. - 100 meter spool - 50 Denier - Breaking strain of 2.20 kg - Recommended for hooks from #8 to #18 - Use of a bobbin with a ceramic tip is recommended

CODE	DESCRIPTION	RETAIL PRICE
SPTSM-01	POWER THREAD SMALL 50 Den. - 01-White - 100 mt.	€ 4.90
SPTSM-02	POWER THREAD SMALL 50 Den. - 02-Black - 100 mt.	€ 4.90

POWER THREAD XL

Technical polymer with a very high breaking strain in relation to its diameter, up to ten times higher than steel of the same diameter, suitable for tying large streamers where an practically indestructible thread is needed that allows any type of operation, both bodies cover and heads closure. Thanks to its calibrated torsion, the fibers remain well connected but still lie flat and smooth, creating uniform and seamless sub-bodies and heads. Available in both black (solid color that does not fade during use) and natural white color that can be easily colored with a permanent marker. This is the most resistant thread in the catalog and it is recommended to use it when exceptional strength needs to be combined with the need to quickly fill spaces without using many turns of thread. The use of cyanoacrylate glue is recommended after a few steps to cement the loops that are very slippery due to the characteristic of the polymer with which it is made. - 65 meter spool - 280 Denier - Breaking strain of 10 kg. - Use of a bobbin with a ceramic tip is recommended

CODE	DESCRIPTION	RETAIL PRICE
SPTXL-01	POWER THREAD XL 280 Den. - 01-White - 65 mt.	€ 3.98
SPTXL-02	POWER THREAD XL 280 Den. - 02-Black - 65 mt.	€ 3.98

PURE SILK

Thin thread made of pure silk, manufactured with a special technique that makes it very shiny and soft. Suitable for both tying entire bodies and for body ribbing with a natural base. Recommended for use with hooks from #12 to #16. - 50 meters spool - 90 Denier

CODE	DESCRIPTION	RETAIL PRICE
SPS-01	PURE SILK 90 Den. - 01-Fluo White - 50 mt.	€ 3.40
SPS-02	PURE SILK 90 Den. - 02-Black - 50 mt.	€ 3.40

SPS-16	PURE SILK 90 Den. - 16-Yellow - 50 mt.	€ 3.40
SPS-17	PURE SILK 90 Den. - 17-Lilac - 50 mt.	€ 3.40
SPS-18	PURE SILK 90 Den. - 18-Ciclamin - 50 mt.	€ 3.40

STANDARD 3/0

The standard tying thread used by most fly tyers. It is characterized by a particularly rough surface that makes it suitable for use with any dubbing. It is also a thread with excellent breaking strength in relation to its size, also suitable for making large bodies and can be used on hooks ranging from #6 to #10. The bonderization treatment used to make it allows, with a minimum of skill, to easily split it in half to make a loop dubbing without doubling it. - 100 meter spool - 135 Denier - Size 3/0

CODE	DESCRIPTION	RETAIL PRICE
SS3-01	STANDARD 3/0 - 01-Fluo White - 100 mt.	€ 2.30

STANDARD 6/0

The standard tying thread used by most fly tyers. It is characterized by a particularly rough surface that makes it suitable for use with any dubbing. It is also a thread with excellent breaking strength in relation to its size, suitable for creating uniform bodies and usable on medium-sized hooks, from #10 to #14. The bonderization treatment used to make it allows, with a minimum of skill, to easily split it in half to make a loop dubbing without doubling it. - 100 meter spool - 110 Denier - Size 6/0

STANDARD 8/0

The standard tying thread used by most fly tyers. It is characterized by a particularly rough surface that makes it suitable for use with any dubbing. It is also a thread with excellent breaking strength in relation to its very close size to a 12/0, also suitable for tying thin and uniform bodies and can also be used on very small hooks. The bonderization treatment used to make it allows, with a minimum of skill, to easily split it in half to make a loop dubbing without doubling it. - 100 meter spool - 72 Denier - Size 8/0

TWISTED 6/0

Special continuous twisted high tenacity fly tying thread, with excellent breaking load in relation to its size. Thread particularly suitable for loop-style fly tying; once the two ends are opened, the return to the original twisted position is practically automatic. Recommended for hook sizes from #10 to #14. - 100 meter spool - 150 Denier - Size 6/0

ANTRON YARN

Brilliant nylon thread with parallel strands, characterized by slightly textured fibers. It is one of the most commonly used products: used as shucks in emergers, spots in parachutes, and in some dries, to adjust the density of tails according to needs. By mixing two different colors, visibility can be increased in different water and light conditions. Fluorescent colors have the characteristic of high visibility, thanks to the brightness of the base material, while in more natural colors it can be used for various parts of flies. Also available in packaged version on a card. - 8 meter spool - 1150 Denier

BODY FLY

Flat translucent film, reinforced by a double support of ultra-thin single-sided nylon. Particularly suitable for tying small nymphs or wet flies. Innovative and easy to use material, thanks to its transparency it is recommended for creating bodies in combination with other materials, both natural and synthetic, thus expanding its possibilities of use. It can also be used for dry flies that do not require a dubbing body or can be made with floss threads. It is not recommended to make the closing knot with the Body Fly but we recommend using a classic tying thread. Usable with a wide range of hook sizes, from size 8 to 20, for both trout and grayling flies. - Spool of 35 meters - Titration of 100 Denier - 0,37 mm width fibers (1/69" inches)

BODY FLY NATURAL

Flat matte film, reinforced with a double support of ultra-thin single-sided nylon. Unlike other versions of our Body Fly, this film comes in extremely natural and opaque colors, for fast creation of imitative bodies that do not change color based on the underbody. Innovative and easy to use material with the bobbin, it can also be used in combination with other materials to create endless color combinations and effects. It can also be used for dry flies that do not require a dubbing body or made with Floss yarns. It is not recommended to make the closing knot with the Body Fly, but we recommend using a classic tying thread. Usable with a wide range of hook sizes, from size 8 to 20, for both trout and grayling flies. - 35 meter spool - 170 Denier - 0,37 mm width fibers (1/69" inches)

BODY FLY PEARL

Flat rainbow film, reinforced by a double support of ultra-thin monofilament nylon. Suitable for tying nymph and wet fly bodies, it can also be used to create various parts of flies. Innovative and easy to use material with a bobbin, it can also be used in combination with other materials to create countless combinations of colors and effects. It can also be used for dry flies that do not require a body made of dubbing or yarn. It is not recommended to make the closing knot with Body Fly but we recommend using a classic tying thread. Can be used with a wide range of hook sizes, from size 8 to 20, for both trout and grayling flies. - 35 meter spool - 170 Denier - 0,37 mm width fibers (1/69" inches)

BRILL

Original version of the Brill made with a very thin core and only transparent fibers. It is a very interesting material for tying nymphs and subsurface flies, giving a translucent effect to the bodies. Excellent also in combination with CDC thoraxes and soft hackle that increase its effectiveness and imitativeness. Also available in the version packaged in a card. - 4 meter spool - 5 mm. fibers

CODE	DESCRIPTION	RETAIL PRICE
SBR-01	BRILL 5 mm. - 01-White - 4 mt.	€ 3.00
SBR-02	BRILL 5 mm. - 02-Black - 4 mt.	€ 3.00

SBR-18	BRILL 5 mm. - 18-Fluo Sunburst - 4 mt.	€ 3.00

BRILL LARGE

Original version of the Brill Large, made with only transparent fibers in the effect. The reinforced core is suitable for withstanding high winding tensions in medium-large flies. The length of the fibers is about 12 mm, making it suitable for use in streamers and small baitfish, when a UV effect is also sought. It is an excellent material for giving a shiny and ethereal effect to the bodies of fish forage imitations. Also available in the packaged version on card. - 3 meter spool - 12 mm. fibers

CODE	DESCRIPTION	RETAIL PRICE
SBRL-01	BRILL LARGE 12 mm. - 01-White - 3 mt.	€ 3.30
SBRL-02	BRILL LARGE 12 mm. - 02-Black - 3 mt.	€ 3.30

SBRL-11	BRILL LARGE 12 mm. - 11-Fluo Yellow - 3 mt.	€ 3.30
SBRL-12	BRILL LARGE 12 mm. - 12-Fluo Chartreuse - 3 mt.	€ 3.30

BUG WOOL

100% natural Wool thread similar to our Pure Wool, but with a size suitable for hooks up to size #14. Its very imitative color effects, ease of tie as a substitute of dubbing, and its resistance are its main characteristics. It can be assembled by further closing the twist during tying, thus obtaining a very natural segmentation of the body, or the twist can be loosened and opened during tying to obtain a smoother and more uniform body. In both cases, the outer fibers can be extracted using a dubbing brush. As a substitute for traditional dubbing, it is suitable for constructing bodies of all types of flies, either alone or in combination with other materials, such as our Magic Tinsel. - 10 meter spool - 1000 Denier

CODE	DESCRIPTION	RETAIL PRICE
SBW-01	BUG WOOL 1000 Den. - 01-Light Gray - 10 mt.	€ 2.90

EASY DUB

Yarn for tying bodies made with a blend of shiny polyamide fibers mixed with Angelina rainbow used from sizes #12 to #18. It's easy to use and allows you to quickly form any body. Perfect for nymphs and wet flies with bright and durable reflections. It's recommended to use it with a bobbin holder to preserve the integrity of the fibers during tying. - 10 meter spool - 520 Denier

CODE	DESCRIPTION	RETAIL PRICE

GLITTER THREAD

Iridescent thread perfect for tying perdigones, chironomids, and emergers bodies. Also usable as ribbing on dubbing bodies or with threads, the available colors give a wide range of combinations. One of the most used threads for tying perdigones, its reflections offer an infinite range of fly tying possibilities. - 35 meter spool - 230 Denier size

METAL BRAID

Thin braid obtained by mixing two colors, both tone on tone and alternating with ultraviolet and rainbow fibers. The wide range of available colors allows you to always find the right color for your fly. It can be frayed to decrease its size or used whole for medium-sized bodies, such as nymphs and streamers. Being very resistant, it does not require any subsequent coating with glue or resin. Also available in packaged card version. - 5 meter spool - Size 2

CODE	DESCRIPTION	RETAIL PRICE

MICRO CACTUS

The Cactus Chenille 0.8 mm is the smallest Cactus made in the world, obtained through a particular manufacturing process that, despite its small diameter, allows for excellent fiber retention. It adapts to all those patterns where an iridescent effect is necessary, but with very small sizes, such as nymphs and wet flies. Also available in packaged card version. - 3 meter spool - Size 0,8 mm.

CODE	DESCRIPTION	RETAIL PRICE
SMCA-01	MICRO CACTUS Size 0,8 - 01-Fluo White - 3 mt.	€ 3.30

MICROCHENILLE

The classic Microchenille was one of the first synthetic materials of textile derivation, used in fly fishing. Characterized by very short, sparse fibers and without any iridescent or shiny effect, they are held in place by a particular glued bonding. One of the basic products for all small natural-looking artificials. Excellent for creating compact bodies and body extensions, it is also very good for imitations aimed at alternative fly fishing. Also available in packaged card version. - 3 meter spool - Size 0,8 mm.

CODE	DESCRIPTION	RETAIL PRICE

PEARL BRAID SM

Small-sized braid made from overdyed rainbow mylar, suggested for tying both full bodies and partial ribbing. It can also be unraveled, extracting the fibers composing the braid to obtain a flat Mylar for making wings or tails for small flies. To achieve interesting color variations, it can be wrapped over other base threads, producing multiple shades of color. It's also available in a packaged card version. - 5 meter spool - Size 2

RAYON FLOSS X4

Tying thread made of 4 parallel strands of a Rayon Viscose, easily divisible and usable both individually and together. Suitable for tying both large streamers and dry flies, including Valsesan flies, thanks to its brilliance very similar to natural silk. Excellent for tying salmon flies. - 10 meter spool - 300x4 Denier

UV BODY FLY

Flat Ultraviolet film, reinforced by a double support of extremely thin single-bore nylon. Suitable for tying nymph and wet bodies, it can also be used for the creation of various parts of flies. Innovative and easy-to-use material with the bobbin, it can also be used in combination with other materials to create infinite combinations of colors and effects. It can also be used for dry flies that do not require a dubbing body or made with Floss yarns. It is not recommended to make the closing knot with the Body Fly but we recommend using a classic mountaineering thread. Usable with a wide range of hook sizes, from size 8 to 20, for both trout and grayling flies. - 35 meter spool - 170 Denier - 0,37 mm width fibers (1/69" inches)

CODE	DESCRIPTION	RETAIL PRICE
SBFUV-01	UV BODY FLY 170 Den. - 01-Fluo White - 35 mt.	€ 2.95

SBRU-17	UV BRILL 5 mm. - 17-Fluo Mint - 4 mt.	€ 3.30
SBRU-18	UV BRILL 5 mm. - 18-Fluo Sunburst - 4 mt.	€ 3.30

UV BRILL LARGE

Brill Large version, made with transparent fibers mixed with ultraviolet ones. The reinforced core is suitable for withstanding high wrapping tensions in medium-large artificial lures. The fiber length is about 12 mm, making it suitable for use in streamers and small baitfish, when looking for a UV effect as well. It is an excellent material for giving a shiny and ethereal effect to the bodies of baitfish imitations. Also available in a packaged version on a card. - 3 meters spool - 12 mm. fibers

CODE	DESCRIPTION	RETAIL PRICE
SBRUL-01	UV BRILL LARGE 12 mm. - 01-Fluo White - 3 mt.	€ 3.60
SBRUL-02	UV BRILL LARGE 12 mm. - 02-Black - 3 mt.	€ 3.60
SBRUL-03	UV BRILL LARGE 12 mm. - 03-Brown - 3 mt.	€ 3.60
SBRUL-04	UV BRILL LARGE 12 mm. - 04-Tan - 3 mt.	€ 3.60
SBRUL-05	UV BRILL LARGE 12 mm. - 05-Olive - 3 mt.	€ 3.60
SBRUL-06	UV BRILL LARGE 12 mm. - 06-Red - 3 mt.	€ 3.60
SBRUL-07	UV BRILL LARGE 12 mm. - 07-Orange - 3 mt.	€ 3.60
SBRUL-08	UV BRILL LARGE 12 mm. - 08-Purple - 3 mt.	€ 3.60
SBRUL-09	UV BRILL LARGE 12 mm. - 09-Silver - 3 mt.	€ 3.60
SBRUL-10	UV BRILL LARGE 12 mm. - 10-Gold - 3 mt.	€ 3.60
SBRUL-11	UV BRILL LARGE 12 mm. - 11-Fluo Yellow - 3 mt.	€ 3.60
SBRUL-12	UV BRILL LARGE 12 mm. - 12-Fluo Chartreuse - 3 mt.	€ 3.60

ST TYPE

Round metallic thread suitable for tying small or micro bodies or for fine ribbing on all kind of flies. Suitable material also for creating nymph bodies, such as perdigones. - 50 meter spool - 240 Denier

CODE	DESCRIPTION	RETAIL PRICE
SST-01	ST TYPE 240 Den. - 01-Black - 50 mt.	€ 2.75

SST-18	ST TYPE 240 Den. - 18-Black Red - 50 mt.	€ 2.75

FLAT OPAQUE TINSEL

The Flat Opaque Tinsel is a flat film available exclusively in the colors White, Gold, and Silver with a matte effect. It is suitable for tying bodies, wing cases, and ribbing in medium-small sized flies. Also perfect for use on dry flies and emergers, thanks to its low specific weight. Also available packed on capes. - 30 meter spool - Size Small - 105 Denier - 0,37 mm width fibers (1/69" inches)

CODE	DESCRIPTION	RETAIL PRICE
SFOT-01	FLAT OPAQUE TINSEL Small - 01-White - 30 mt.	€ 2.25
SFOT-02	FLAT OPAQUE TINSEL Small - 02-Silver - 30 mt.	€ 2.25
SFOT-03	FLAT OPAQUE TINSEL Small - 03-Gold - 30 mt.	€ 2.25

FLAT TINSEL

Metallized film suitable for tying bodies, wing cases, and ribbing on medium-small flies. Also perfect for use on dry flies and emergers, thanks to its low specific weight. - 30 meter spool - Small size - 130 Denier - 0,37 mm width fibers (1/69" inches)

CODE	DESCRIPTION	RETAIL PRICE
SFT-01	FLAT TINSEL Small - 01-Silver - 30 mt.	€ 2.10
SFT-02	FLAT TINSEL Small - 02-Gold - 30 mt.	€ 2.10
SFT-03	FLAT TINSEL Small - 03-Red - 30 mt.	€ 2.10

SPT-07	PEARL TINSEL Small - 07-Pearl FL Orange - 30 mt.	€ 2.15

PEARL TINSEL MEDIUM

Flat rainbow film suitable for creating bodies, wing cases, and ribbing for medium-sized flies. It can also be used in combination with other materials for streamer fly tying. To achieve interesting color alternatives, it can be wrapped over other base threads, creating multiple shades of color. Also available in a packaged version. - 20 meter spool - Medium size - 0,8 mm width fibers (1/32" inches)

CODE	DESCRIPTION	RETAIL PRICE
SPTMD-01	PEARL TINSEL Medium - 01-Pearl Rainbow - 20 mt.	€ 2.15

PHOSPHORESCENT FIBERS

Flat film treated with a special pigment that reacts to ultraviolet light (both solar and artificial). It is suitable for tying bodies of flies to be used in deeper waters, where it releases the captured light brightness, remaining highly visible in the dark. Exceptional for capturing the attention of predators, especially in saltwater in low-light conditions. Also available packed on capes. - 30 meter spool - 150 Denier - 0.37 mm width fibers (1/69" inches)

CODE	DESCRIPTION	RETAIL PRICE
SPHF-01	PHOSPHO FIBERS 150 Den. - 01-Evergio - 30 mt.	€ 2.10
SPHF-02	PHOSPHO FIBERS 150 Den. - 02-Green - 30 mt.	€ 2.10

SPHF-07	PHOSPHO FIBERS 150 Den. - 07-Blue - 30 mt.	€ 2.10

X-TYPE

Flat metallic film, reinforced with a special double polyamide mono filament. Highly suitable for ribbing or for bodies of small and very small flies. Perfect material for small nymphs like perdigones for grayling or selective trout. To increase its strength, it is recommended to coat it with UV resin or Buzzer Wrap. To be used particularly on hooks from #18 to #22. - 50 meter spool - 90 Denier - Fibers of 0.25 mm width (1/100" inches)

SRBA-09	ROD BUILDING Size A - 09-Medium Green - 100 mt.	€ 2,65

FLY TYING MATERIALS

TEXTREME fly tying materials are engineered specifically to meet the technical requirements of modern artificial fly construction.

Development begins with a functional analysis of the final application and drives the selection of fibers, dimensions, raw material combinations, and color ranges. Each material is then defined through an iterative cycle of design, practical testing, and real-world validation until it is approved for production.

A key element of the system is dye process control, a critical phase in defining material performance. This operation is managed by specialized textile partners with whom we have worked for decades, ensuring consistent and repeatable quality standards.
This approach enables precise, uniform, and most importantly reproducible colors over time, ensuring continuity across production batches and consistency within color ranges.
Dye process control also enables the development of technical color palettes specifically designed for fly tying, where color performance on synthetic and natural fibers is evaluated based on light behavior, transparency, and final performance in water.
The combination of advanced synthetic fibers, sometimes blended with natural fibers, and controlled production processes allows us to create materials with technical characteristics that are not achievable through traditional approaches.

The goal of the TEXTREME development system is to deliver materials that are increasingly versatile, reliable, and easy to use, designed to provide fly tyers with a precise, efficient, and creatively enabling tying experience.

PACKAGING

TEXTREME materials are packed in high-strength polypropylene bags designed to ensure product protection and compatibility with retail display systems.

Each pack includes a Euro Hole for standard pegboard display in specialty fly shops.
The semi-permanent adhesive closure is designed to allow multiple openings and resealing, supporting in-store product presentation and customer interaction while maintaining product integrity.

The packaging and labeling process is managed using in-house developed machinery configured to our production requirements, ensuring consistent and repeatable output over time.
Each label includes an EAN-13 barcode and full technical product information, enabling standardized handling across the entire distribution chain.

The packaging system also integrates sustainability principles: disposal and recycling instructions are printed on the back of each pack in compliance with current European packaging regulations.

CACTUS CHENILLE 0.8MM

The Cactus Chenille 0.8 mm is the smallest Cactus ever made, achieved through a special manufacturing process that, despite its small diameter, allows excellent retention of effect fibers. It is suitable for all those patterns where it is necessary to have an iridescent effect, but with very small dimensions, such as nymphs and wet flies. Also available in a spooled version. - 3 meter card - 0,8 mm. diameter

CODE	DESCRIPTION	RETAIL PRICE

CACTUS CHENILLE 2MM

The Cactus Chenille 2 mm. is obtained through a particular manufacturing process that, despite its small diameter, allows for excellent retention of the effect fibers. It is suitable for all those patterns where it is necessary to have an iridescent effect, but with reduced dimensions, such as nymphs and subsurface flies. It retains the peculiar characteristics of the Cactus Chenille 0.8 mm, but the slightly larger diameter allow for use on hooks from size 10 to 14 for many kind of flies. - 3 meters card - 2 mm. diameter

CRYSTAL CACTUS 10MM

A Variant of the classic Cactus in the 10 mm. size, made by replacing the flat pearl fibers with our Crystalflash fibers. This way, we have achieved a particularly intense and iridescent effect, especially in medium/dark shades. Excellent for large flies and stillwater flies that require a different effect once wet compared to the original Cactus Chenille. - Card of 3 meters - 10 mm. diameter

CRYSTAL CACTUS SOLID

Very similar to the Crystal Cactus in the size of 10 mm., it is made with only Crystalflash fibers in solid colors instead of overdye pearl. - 3 meter card - 10 mm. diameter

CODE	DESCRIPTION	RETAIL PRICE
PCRCS10-140	CRYSTAL CACTUS SOLID 10 mm. - 140-Silver - 3 meters	€ 3.50
PCRCS10-141	CRYSTAL CACTUS SOLID 10 mm. - 141-Gold - 3 meters	€ 3.50

EGGSTASY

After years of producing for other brands, we have decided to offer Eggstasy under our own label, renewing the color range with new and effective shades. The replicability of each color is guaranteed by our dyeing system, which, in addition to offering high precision, has an extremely low environmental impact. Eggstasy is an excellent material for creating egg imitations, but it is also suitable for other applications to attact various types of fish. Unlike traditional materials used for these imitations, which require loop techniques or complicated tying steps, Eggstasy significantly simplifies the process, even on small hooks. The thin, translucent, and textured fibers retain water, giving the imitation a very realistic appearance. These fibers also have good movement during fishing action, adding further vitality to the fly. Eggstasy is suitable for many other types of flies, both for saltwater and freshwater. Thanks to the thermofusible bonding core, which perfectly retains the fibers while being very thin, it is also possible to create imitations of large worms or body extensions. - 2-meter package - 12 mm. fibers

FAB-ULOUS CHENILLE 15 MM.

The Fab-ulous Chenille 15 mm is a new chenille made with the same fibers as Eggstasy, but with an extreme thermal treatment that makes them very flat, giving them an appearance similar to traditional chenille. This effect is intended to give the fibers more mobility in flies designed for very static fishing, keeping the fly lively even with a very slow retrieve. Initially created for stillwater flies, it is also well-suited for tying bass and predator flies in general. Our thermofusible bonding, widely used in our most recent chenilles, greatly facilitates tying and holds the effect fibers perfectly. Its small diameter also allows for the combination of different colors or materials, opening up new tying possibilities. - 3-meter package - 15 mm. fibers

GLIMMER CHENILLE 15MM

New 15 mm. dense chenille and made with a new holographic fiber, very soft even on diameters of this type. Thanks to the use of modern materials, the fibers are perfectly held in the core, avoiding dispersion during the tying phase and during use in fishing. Suitable for making stillwater Blobs, minnow bodies and for all those uses where high density is sought but with excellent softness and mobility. By twisting it on itself, or mixing it in different colors and then trimming it into the desired shape, it allows you to obtain very bright and catchy bodies in streamers. - 3 meter card - 15 mm.diameter

GUMMY CHENILLE 15MM

The new Gummy Chenille 15 mm. is made with shiny elastic fibers that give it a rubbery and deceptive effect for fish that do not perceive it as synthetic material. The effect is further amplified by a special silicone treatment during dyeing. The elastic fibers are tied to the base with a synthetic under hair that provide the right stability during the tying, keeping the elastic well stretched and in position. The very thin core is made with new technical materials that bind the fibers of the effect, retaining them as best as possible, avoiding their release during the tying and use. In case you tie it like squirmy or worms, we recommend to slightly glue the end to make it more robust to fish attacks. The 15 mm. size is suitable for various patterns: egg imitations, worms, blobs, and big streamers. - 2 meter card - 15 mm. diameter

ICE-TRANSLUCENT 10 MM.

Ice-Translucent 10 mm is the modern version of the classic Ice Chenille that we have been producing since 1975. This new version is primarily optimized for tying Blobs and Boobies and has the unique feature of creating a gelatinous effect on the fly when in water. It can also be used in a multitude of flys, both for saltwater and stillwater, a field in which the classic Ice Chenille excels. The thermofusible bonding, made with cutting-edge materials, is very thin yet robust. This allows for tying on small hooks or creating bicolor or tricolor effects, even in combination with other chenilles, as it does not thicken the body of the fly. - 2-meter package - 10 mm. fibers

CODE	DESCRIPTION	RETAIL PRICE
PIT10-120	ICE-TRANSLUCENT 10 mm. - 120-Fluo Chartreuse - 2 meters	€ 3.60

JUMBO CACTUS PEARL 30MM

The largest Cactus ever made. Its exceptional width of 30 millimeters makes it suitable for all those flies that require bulky but light bodies. In fact, the amount of effect fibers is calibrated in order to obtain an ideal coverage of the pattern, without affecting the final weight. In this version, some of the base fibers are rainbow. Great for tying streamers and central parts of bodies in tube flies. - 3 meter card - 30 mm. diameter

CODE	DESCRIPTION	RETAIL PRICE
PJCP-10	JUMBO CACTUS PEARL 30 mm. - 10-White/Pearl - 3 meters	€ 3.10

MICROCHENILLE CARD

The classic Microchenille was one of the first synthetic textile-derived materials used in fly tying. Characterized by very short, sparse fibers without any iridescent or shiny effect, they are held in position by a special glued core. One of the basic products for all small natural-looking flies. Excellent for creating compact bodies and body extensions, also very useful for imitations geared towards alternative fly fishing. Also available in spool packaging. - 3 meter card - Size 0.8 mm.

CODE	DESCRIPTION	RETAIL PRICE

MIXED HOLO CHENILLE

Variant of the classic Cactus in the size of 10 mm., it is made with a special blend of metallic fibers that create very similar light effects to holographic ones. Excellent for streamers and flies for stillwater fishing that require different light effects compared to the classic version with Pearl. - 3 meter card - Size 10 mm.

CODE	DESCRIPTION	RETAIL PRICE

NEON OPAQUE 10 MM.

Neon Opaque 10 mm is a chenille specifically designed for tying Blobs, characterized by opaque fibers that create a very vivid color effect. The thermofusible bonding core, made with cutting-edge materials, is very thin yet robust. This allows for tying on small hooks or creating bicolor or tricolor effects, even in combination with other chenilles, as it does not thicken the body of the fly. This product is also suitable for other types of fly tying, like a classic chenille, taking advantage of its modern features, making it a versatile product with multiple applications. - 2-meter package - 10 mm. fibers

PEARL EGGSTASY

After years of producing for other brands, we have decided to offer Pearl Eggstasy under our own brand, renewing the color range with new and effective shades. The replicability of each color is guaranteed by our dyeing system which, in addition to offering high precision, has a very low environmental impact. Pearl Eggstasy is an excellent material for creating egg imitations, but it is also suitable for other applications to attract various types of fish. This version includes thin pearlescent filaments that add yellow-pink reflections to light colors and blue-green reflections to dark colors. Unlike traditional materials used for these imitations, which require loop techniques or complicated tying steps, Pearl Eggstasy significantly simplifies the process, even on small hooks. The thin, translucent, and textured fibers retain water, giving the imitation a very realistic appearance. These fibers also have good movement during fishing action, adding extra vitality to the fly. Pearl Eggstasy is suitable for many other types of flies, both for saltwater and freshwater. Thanks to the thermofusible bonding core, which perfectly retains the fibers while being very thin, it is also possible to create imitations of large worms or body extensions. - 2 meter package - 12 mm. fibers

ROUND CHENILLE 2MM

2 mm. diameter volumized polyester chenille, a modern version of the classic rayon viscose chenille. It is produced using a special manufacturing process and the use of technological materials that ensure excellent fiber retention. Its particularly round and voluminous appearance facilitates the tying of perfectly regular and lightweight bodies. If you decide to use it as an extension in flies like worms, it is recommended to pay attention to preserving the integrity of the chenille's tip to prevent it from unraveling, through burning or gluing. - 3 meter card - 2 mm. diameter

SQUIRTY CHENILLE 1 MM.

Next-generation chenille, crafted with high-absorption microfibers and a thermofusible core that enhances strength without compromising its remarkable mobility. This combination allows for exceptional mobility in water, despite its mere 1-millimeter diameter. Primarily designed to mimic extremely small worms for tying on hooks up to #16-18, it lends itself particularly well to being wrapped around the hook for forming bodies, such as pupae, or for creating a hot spot, as in the case of imitating stonefly and caddisfly larvae. It is available in both natural colors for a realistic imitation and vibrant fluorescent colors for increased visibility, even in murky water conditions. - 2 meter card - 1 mm. fibers

CODE	DESCRIPTION	RETAIL PRICE

SUEDE CHENILLE

Very dense and perfectly round variant, designed and developed to create imitations with material not wrapped around the hook, such as San Juan worms. It is made with a special glued core that prevents fiber loss. To create worms, it is recommended to burn one end with a lighter, in order to create a more realistic appearance of the worm itself. - 3 meter spool - 2 mm. diameter

SUPER ICE CHENILLE 10MM

Dense 10 mm. chenille made with a mix of translucent fibers, thanks to the use of modern materials the fibers are perfectly retained, avoiding loss during use. Mainly conceived for Blob, it is also suitable for streamer bodies. By blending two different chenilles together, twisting them before wrapping them once fixed on the hook, it is possible to obtain different shades and hues of color. - 3 meter card - 10 mm. diameter

SUPER UV G-CORE 10 MM.

The Super UV G-Core 10 mm has been designed for creating stillwater flies, with a special mix of fibers that simulate movement even when the fly is used for static fishing without retrieval. The addition of ultraviolet fibers increases the attractiveness of the entire color range, giving a purple/blue hue, especially to darker shades. The thermofusible bonding core, made with cutting-edge materials, is very thin yet robust, and it holds the effect fibers perfectly. This allows for tying on small hooks or creating bicolor or tricolor effects, even in combination with other chenilles, as it does not thicken the body of the fly. - 2-meter package - 10 mm. fibers

UV EGGSTASY

After years of producing for other brands, we have decided to offer Uv Eggstasy under our own brand, renewing the color range with new and effective shades. The replicability of each color is guaranteed by our dyeing system which, in addition to offering high precision, has a very low environmental impact. Uv Eggstasy is an excellent material for creating egg imitations, but it is also suitable for other applications to attract various types of fish. This version includes thin ultraviolet filaments that give blue/purple reflections, which are particularly evident in medium to dark colors. Unlike traditional materials used for these imitations, which require loop techniques or complicated tying steps, Uv Eggstasy significantly simplifies the process, even on small hooks. The thin, translucent, and textured fibers retain water, giving the imitation a very realistic appearance. These fibers also have good movement during fishing action, adding extra vitality to the fly. Uv Eggstasy is suitable for many other types of flies, both for saltwater and freshwater. Thanks to the thermofusible bonding core, which perfectly retains the fibers while being very thin, it is also possible to create imitations of large worms or body extensions. - 2 meter package - 12 mm. fibers

UV JUMBO CACTUS 30MM

The largest Cactus ever made. Its exceptional width of 30 millimeters makes it suitable for all those flies that require bulky but light bodies. In fact, the quantity of effect fibers is calibrated in order to obtain an ideal coverage of the pattern, without affecting the final weight.In this version, some of the base fibers are rainbow, to obtain new color reflections, optimized for large predators. Excellent for tying streamers and central parts of tube flies, when you want to achieve a particular effect with UV reflections. - 3 meter card - 30 mm. diameter

UV SUPER CHENILLE 15MM

Dense chenille of 15 mm, made with a mix of translucent and ultraviolet fibers, thanks to the use of modern materials the fibers are perfectly retained, avoiding any loss during use. Primarily designed for Blob flies, it is also suitable for streamer bodies. By mixing two different chenille colors together, twisting them before wrapping them once fixed on the hook, it is possible to obtain different shades and nuances of color. The whole is enriched with ultraviolet reflections for greater effectiveness even in dark water conditions. - 3 meter card - 15 mm. diameter

BRILL LARGE CARD

The Brill Large is made exclusively with transparent fibers for a natural effect. The reinforced core is designed to withstand high wrapping tensions, making it suitable for use in medium to large-sized flies. With fibers measuring around 12 mm in length, it's particularly well-suited for streamers and small baitfish patterns, especially when aiming to achieve a translucent and ethereal appearance. Also available in the spool version. - 3 meter card - 12 mm. fibers

FLAT CHENILLE 20MM

Very similar to the classic Cactus Chenille, it differs from it for its stitched fibers, mainly arranged flat and quite sparse. Thanks to its very thin core, it can be easily used in many patterns, also the small ones. The arrangement of the fibers allows for a more orderly effect during wrapping and less invasive filling during palmering. The size of 20 mm. is suitable for medium-sized flies. - 3 meter card - 20 mm. fibers

LONG HAIR HOLO

The Long Hair Holo of 30 mm. is made with only metallic fibers. Variants with tone-on-tone colors or mixed with ultraviolet or rainbow fibers are available. The color effects satisfy any requirement of the tyer. It is exceptional for tying complete streamers or their central parts. Speed of use, softness, and reflections are the main features that, combined with its resistance, make it a must for lovers of predators fishing of any size, both in freshwater and saltwater. - 3 meters card - 30 mm. fibers

PPC70-130	PALMER CHENILLE 70 mm. - 130-White Pearl - 1 meter	€ 5.30

SBRIGGLE LARGE

The Sbriggle Large is a brand new straggle with filaments of 12 mm in length, sewn with a very thin core that allows for easy tying on the hook without adding volume. Thanks to the mix of dyed and holographic colors, we have obtained a complete range that ranges from normal colors to fluorescent ones, characterized by beautiful and captivating light effects. The fineness of the fibers also guarantees excellent movement in water. The fibers are arranged only on one side of the core and allow for palmer it. By slightly twisting it before tying, you can get a shape more suitable arrangement for tying bodies. Recommended for tying wet flies and medium-sized stillwater streamers. - 2 meter card - 12 mm. fibers

SBRIGGLE SMALL

The Sbriggle Small is a brand new straggle with 5 mm long filaments, sewn with a very thin core that allows for easy tying on the hook without adding volume. Thanks to the mix of solid and holographic colors, we have obtained a complete range that ranges from normal to fluorescent colors, characterized by beautiful and captivating light effects. Furthermore, the fineness of the fibers guarantees excellent movement in water. The fibers are arranged all around the axis of the core and allow for quickly tying both complete bodies and collars. Recommended for tying medium-sized wet flies and small to medium-sized stillwater streamers. - 2 meter card - 5 mm. fibers

SUPER LONG HAIR

Made with the same principles as the Long Hair Large at 30 mm., it differs for having much finer translucent fibers and a thinner core. Very voluminous and light, it behaves similarly to natural Marabou in water. The fineness of the fibers is the true difference compared to the classic Long Hair, and this leads to greater mobility of the artificial fly in water. - 3 meter card - 30 mm. fibers

UV BRILL LARGE CARD

Version of Brill Large, made with transparent fibers mixed with ultraviolet ones. The reinforced core is designed to withstand high wrapping tensions, making it suitable for use in medium to large-sized flies. With fibers measuring around 12 mm in length, it's particularly well-suited for streamers and small baitfish patterns, especially when aiming to achieve a translucent and ethereal appearance, with a touch of ultraviolet effect. Also available in a spooled version. - 3 meter card - 12 mm. fibers

UV PALMER CHENILLE

20mm Palmer Chenille made with ultraviolet fibers blended with thin, translucent, highly mobile fibers. Thanks to its very thin core, it's perfect for preventing bulk when tying bodies. It's ideal for palmer-style flies, and can also be twisted by hand to tie streamer bodies. It's recommended for medium to small streamers where fiber mobility is essential. Available in 15 colors, both natural and fluorescent. - 2 meter card - 20 mm. fibers

UV SUPER LONG HAIR

Variant of the Super Long Hair 30 mm. Slightly denser and with the addition of ultraviolet fibers. Very voluminous and lightweight, it behaves similarly to natural Marabou in water. The fine fibers are the true difference with the classic Long Hair, resulting in greater buoyancy of the artificial fly in the water. Enriched with ultraviolet reflections, it will also be effective in veiled water conditions. - 3 meter card - 30 mm. fibers

UV WISP STRAGGLE

New 5 mm. Straggle, made with ultra-fine metallic and ultraviolet fibers mixed with very thin support fibers to enhance its movement in the water. The core doesn't add bulk to the body of the fly, and when combined with the sparsely distributed effect fibers, it allows for use even on very small hooks. Ideal for nymphs and wet patterns, as well as small streamers. It can be used in combination with a wide range of natural and synthetic materials to increase its movement in the water and realism. - 3 meter card - 5 mm. fibers

METAL BRAID CARD

Thin braid obtained by mixing two colors, both tone-on-tone and alternating with ultraviolet and rainbow fibers. The wide range of colors available allows you to always find the right color for your fly. It can be unraveled to decrease its size or used as a whole for medium-sized artificial fly bodies, such as nymphs and wet flies. Being very resistant, it does not require any additional coating with glue or resin. Also available in the spooled version. - 3 meter card - Size 2

PEARL BRAID 2

Small-sized braid made from overdyed rainbow mylar, suggested for tying both full bodies and partial ribbing. It can also be unraveled, extracting the fibers composing the braid to obtain a flat Mylar for making wings or tails of small flies. To achieve interesting color variations, it can be wrapped over other base threads, obtaining multiple shades of color. Also available in a spooled version. - 3 meters card - Size 2

STRETCH FLOSS ROUND LARGE

Round fiber with a very high elasticity that can be manually stretched, reducing its diameter by as much as four times. Mainly used for legs and antennae, it is also an excellent material for ribbing or for segmented bodies. The dye is particularly long-lasting and prevents discoloration during use. - Pack of 25 strands

CODE	DESCRIPTION	RETAIL PRICE

ANTRON YARN CARD

Brilliant polyamide thread with parallel fibers, characterized by slightly textured fibers. It is one of the most commonly used products, such as for tails in emergers, spots in parachutes, and some dry flies, to adjust the density according to needs. By mixing two different colors, visibility can be increased for different water and light conditions. Fluorescent colors have the characteristic of having high visibility, thanks to the brightness of the base material, while the natural colors can be used for trying various parts of flies. Also available on spools. - 8 meter card

BUZZER WRAP

Translucent film particularly suitable for tying ribbing of chironomid larvae and stillwater flies in general. Also usable as long fiber in streamer flies. The particular lightweight and transparent structure makes it an excellent covering for bodies, allowing to strengthen them and offering reflections and different shades depending on the material it is overlapped with. - 0,8 mm fibers width (1/32" inches) - pack of 100 strands

MAGIC TINSEL COMBO PACK

Special Pearlescent/Ultraviolet film with beautiful color-changing effects. Offered in a pack with two widths, 0.8 and 1.6 mm, it covers all possible uses, from wing cases to body ribbing, and as main material for bodies with changeling shades. Being semi-transparent, it allows for infinite combinations by first creating an underbody with tying thread (Standard or Floss series), and then wrapping the desired color of Magic Tinsel. Thanks to its special lamination, it can also be stretched with a slight pull, transforming into a tubing with excellent strength and a unique light effect (illustrated instructions on the back of the blister). It can be used as ribbing material instead of wire, adding an extra touch of light and color to the fly, while still maintaining excellent strength and not slipping on the fibers. The same tubing can also be used as the main material for forming entire bodies (or parts of them), wrapping it by hand like any thread, as it is very soft and flexible. For example, if you create a body with the Flat version and then wrap over it our Synthetic Biot you can obtain fantastic and imitative nymph, chironomid, wet and dry fly bodies. - One package, two sizes, four usage options! - Card containing two fiber widths, 0,8 and 1,6 mm. (1/32" and 1/16" inches) - 1.5 meter card of each size (3 meters in total) - Instructions on the back of the package

NYLON BLEND

Polyamide fiber blended with rainbow angelina fibers. It is made in continuous carded tape for easy use and, by stripping the fibers, it is easy to tie bodies of small streamers and heads with lots of volume, profile, and brightness. By cutting it with scissors to the desired size, you obtain an excellent dubbing material. - Tape of 20 cm.

SYNTHETIC BIOT

Triangular adhesive and semi-transparent strips that mimic natural biot, but with the ribbing of a quill. The triangular shape allows for tying perfect bodies even on very small hooks, while the transparency allows for using underbodies of various shades and different materials, thus creating infinite color variations. The presence of a light layer of glue guarantees easy applications and avoids undesired random unrolling. It is advisable not to fix the triangular adhesive strip too tightly on the hook to maintain transparency and abdominal ring effect. To obtain a smooth body, align the wraps; to achieve a rough body, slightly overlap the wraps during wrapping. - Package containing 20 triangular strips - The ten strips in the package are cut in a triangular shape, separate them carefully

ANGEL HAIR 8"

Angelina metallic, rainbow, and ultraviolet fibers, 8 inches in length. Material that can be used for various purposes, can be shredded and used as dubbing alone or mixed with natural dubbing to create highlights. Leaving it in its original length makes it an excellent material for tying streamers to achieve shine and mobility, both in the bodies and heads. It is recommended to properly arrange the fibers with your hands before using them. - 1.5 gram packet

BAUER'S PIKE FLASH 1/32"

Flat film made with holographic effects produced by a laser. Packaged in a 32 cm. long skein, it is a material particularly suitable for tying saltwater and freshwater streamers. Its size makes it perfect for providing flash to larger streamers, especially those used for pike. Whether incorporated in a loop for added volume or fixed at full length for a swimming effect, these fibers guarantee durability and a vibrant shine to the flies. Using metal combs directly on the fibers during tying is not recommended, as it could potentially compromise their structure irreversibly. Also available in spool version. - 0,8 mm fibers width (1/32" inches) - Pack of 300 strands

CRIMPY FLASH

Flat Mylar reinforced with two crossed nylon threads for added strength. In addition to the classic solid colors, we have created vibrant shades by mixing two or more colors together, also adding ultraviolet and rainbow fibers, to obtain new and effective combinations. Ideal for all streamers, this material is very soft and enhances the movement of the streamers when used in a loop. To increase its volume, it is recommended to combine it with stiffer materials for easier execution. The individual fibers can also be used for ribbing on small fly bodies. - 0,37 mm fibers width (1/69" inches) - Pack of 300 strands

CRYSTALFLASH JUMBO PACK

Jumbo Pack with 20% discount and fibers twice as long as traditional packaging. Twisted Pearl Mylar, with a characteristic light effect. Perfect for streamers but can also be used for ribbing on bodies, to add a touch of brightness. Also interesting for tying nymphs and emergers, experimenting with it alone or mixing two or more colors together. For this use, we suggest pulling it lightly during tying in order to make it flat, as originally before twisting. Very commonly used material for creating spot in imitations such as shrimp for sea trout or bonefish, but also for classic clouser minnows. It is also a good material for stillwater patterns, when a touch of brilliance is necessary. It is not as soft as other materials but guarantees durability and shine even when wet. - Jumbo pack measuring 37 cm, containing 600 strands

GLOSSY FLASH

Flat Mylar, in addition to the classic colors, new blends have been created using ultraviolet and pearlescent fibers, thus obtaining particular chromatic effects. By mixing it with other similar fibers, but characterized by different density and softness, it allows obtaining a very interesting effect in streamers for predators, also tied in a loop, thanks to the color effects obtained from the fiber mix. - 0,37 mm fibers width (1/69" inches) - pack of 300 strands

GLOSSY PEARL

Pearlescent flat Mylar, in addition to being used in small, medium and large streamers, the individual fibers can also be used for ribbing or for forming bodies. By mixing it with other similar materials, but characterized by different density and softness, it allows to obtain a very interesting effect in streamers for predators, also tied in a loop. This is the smallest available version, and therefore with fibers that are half the width compared to Glossy Pearl Medium. Also available in a spooled version. - 0,37 mm fibers width (1/69" inches) - pack of 300 strands

CODE	DESCRIPTION	RETAIL PRICE
PGP69-131	GLOSSY PEARL 1/69" - 131-Ultraviolet - 300 strands	€ 4.15

GLOSSY PEARL 1/16"

Flat pearlescent Mylar, in addition to being used in medium and large streamers, the single fibers can also be used for ribbing or forming bodies. By mixing it with other similar materials, but characterized by different densities and softness, allows you to obtain a very interesting effect in streamers for predators, also tied in a loop. This is the largest available version, and therefore with fibers twice as wide as Glossy Pearl Medium. Also available in a spooled version. - 1,6 mm fibers width (1/16" inches) - pack of 75 strands

CODE	DESCRIPTION	RETAIL PRICE
PGP16-132	GLOSSY PEARL LG 1/16" - 132-Pearl Rainbow - 75 strands	€ 4.45

GLOSSY PEARL 1/32"

Pearlescent flat mylar, in addition to being used in medium and large streamers, the single fibers can also be used for ribbing or forming bodies. By mixing it with other similar materials, but characterized by different density and softness, it allows for a very interesting effect in streamers for predators, also tied in a loop. Intermediate version between the smaller and larger available size of Glossy Pearl. Also available in a spooled version. - Fibers of 0.8 mm width (1/32" inches) - pack of 150 strands

CODE	DESCRIPTION	RETAIL PRICE
PGP32-132	GLOSSY PEARL MD 1/32" - 132-Pearl Rainbow - 150 strands	€ 4.45

GLOSSY PEARL MD JUMBO PACK

Jumbo Pack with 20% savings and fibers twice as long as traditional packaging. Pearlescent flat mylar, in addition to being used in medium and large streamers, the single fibers can also be used for ribbing or forming bodies. By mixing it with other similar materials, but characterized by different density and softness, it allows for a very interesting effect in streamers for predators, also tied in a loop. Intermediate version between the smaller and larger available size of Glossy Pearl. Also available in a spooled version. - 0.8 mm fibers width (1/32" inches) - Jumbo pack measuring 37 cm long, containing 600 strands

HOLOGRAPHIC FIBERS 1/16"

Flat film made with holographic effects created with laser. Suitable for ribbing and bodies of streamers, it is an essential material for adding a touch of shine when combined with other fibers such as Crystalflash, Glossy Flash, Crimpy Flash, or natural fibers like Bucktail. An larger version of the famous Bauer's Pike Flash. Suitable for tying tube flies and streamers for pike, especially if you are looking for more pronounced light effects and reflections compared to the smaller version. Also available in a spooled version. - 1,6 mm fibers width (1/16" inches) - pack of 75 strands

OPAQUE FLASH JUMBO PACK

Jumbo Pack with 20% savings and fibers double the length compared to traditional packaging. New flat film with matte metallic colors, available in Gold and Silver. Similar in texture to Holographic Fibers 1/69", it is suitable for tying streamers when a more discreet color effect is desired compared to other flash fibers. Also excellent for use as ribbing in various types of flies. Also available in a spooled version. - 0,37 mm width fibers (1/69" inches) - Jumbo pack is 37 cm long and contains 600 strands

CODE	DESCRIPTION	RETAIL PRICE
POFJ-140	OPAQUE FLASH JUMBO PACK 1/69" - 140-Silver - 600 Strands	€ 7.55
POFJ-141	OPAQUE FLASH JUMBO PACK 1/69" - 141-Gold - 600 Strands	€ 7.55

PHOSPHO FIBERS JUMBO PACK

Jumbo Pack with 20% savings and fibers twice as long as traditional packaging. Flat film treated with a special pigment that reacts to ultraviolet light (both solar and artificial). Once exposed to ultraviolet action, it remains bright in the dark for several minutes. Material suggested for tying baits to be used at depth, such as sabiki or night fishing bait. Exceptional for capturing the attention of predators, especially in saltwater with low brightness conditions. Also available in a spooled version. - 0,37 mm width fibers (1/69" inches) - Jumbo pack measuring 37 cm long containing 600 threads.

CODE	DESCRIPTION	RETAIL PRICE
PPFF69J-101	PHOSPHO FIBERS JUMBO PACK 1/69" - 101-Pink - 600 Strands	€ 8.80

PPFF69-88	PHOSPHORESCENT FIBERS 1/69" - 88-Lilac - 300 strands	€ 4.90

PREDATOR BAIT FIBERS

Flat Mylar reinforced with two intersecting strands of polyamide. Variations in color have been achieved by blending three to four different bases together, also in combination with ultraviolet and pearlescent fibers, to create new and effective combinations. Ideal for all streamers, the single fibers can also be used for ribbing on small bodies. For loop use, it is recommended to combine it with less delicate materials to preserve its integrity during the twisting process with the dubbing twister. This material lends itself to various uses for both saltwater and freshwater streamers. Soft and shiny, it ensures lifelike swimming action and brilliance in the flies. - 0,37 mm fibers width (1/69" inches) - Pack of 300 strands

CODE	DESCRIPTION	RETAIL PRICE

UV CRYSTALFLASH

Twisted Ultraviolet Mylar, with a characteristic light effect. Perfect for streamers but can also be used for ribbing on bodies, to add a touch of brightness. Also interesting for tying nymphs and emergers, experimenting with it alone or mixing two or more colors together. For this use, we suggest pulling it lightly during tying in order to make it flat, as originally before twisting. Very commonly used material for creating spot in imitations such as shrimp for sea trout or bonefish, but also for classic clouser minnows. It is also a good material for stillwater patterns, when a touch of brilliance is necessary. It is not as soft as other materials but guarantees strength and shine even when wet. - pack of 300 strands

CODE	DESCRIPTION	RETAIL PRICE

MAGIC FILM THICK 0.20MM

Film with a thickness of 0.2 mm, with iridescent shades and infinite applications. It is a rubbery and sturdy material, with many reflections that change depending on the base on which it is fixed. It can be used in all type of dressings: in dry flies, wet flies, nymphs, full body and wing cases, in streamers as lateral line, fins, head covering and eyes. It can be cut to achieve the desired profile or shape, simply using a cutter or a sharp scalpel, with the help of a ruler it is possible to create very thin strips. No video or photo is able to truly capture the reflections and colors of this versatile material, it must be seen live and, above all, tried to appreciate its many tying capabilities. - Sheet measuring 10 x 15 cm.

CODE	DESCRIPTION	RETAIL PRICE
PMFT-163	MAGIC FILM THICK 0,20 MM. - 163-Pearl Multicolor - 10 x 15 cm.	€ 4.90

UV MOULD FOR NYMPH AND SHRIMP

UV Mould for Nymph and Shrimps is a special mold that allows you to create wing cases and shrimp bodies. By using your preferred UV resin, you can achieve a customized body in very little time. Use a powerful UV lamp to effectively cure the product. Applying a very light layer of wax before placing the resin for curing in the mold will make it easier to remove the piece at the end of the process. - Package includes 1 mold with various shapes and sizes

CODE	DESCRIPTION	RETAIL PRICE
UMKNS-TX	UV MOULD KIT - Uv Mould Nymph/Shrimp Set - 1 pcs.	€ 15.20

UV MOULD FOR STREAMER HEADS

UV Mould for Streamers is a special mold that allows you to easily create streamer heads. By using your preferred UV resin (along with dyes, glitters, markers if desired), you can achieve a customized streamer head in very little time. Use a powerful UV lamp to effectively cure the product. Applying a very light layer of wax before placing the UV resin for curing in the mold will make it easier to remove the piece at the end of the process. - Package includes 3 molds with various shapes and sizes

CODE	DESCRIPTION	RETAIL PRICE
UMKST-TX	UV MOULD KIT - UV Mould Streamer Set - 1 pcs.	€ 15.20

AC BRILL

Original version of Brill made with a very thin core and only transparent fibers. It is a very interesting material for tying nymphs and submersibles, giving a translucent effect to the bodies. Also excellent in combination with CDC thoraxes and soft hackles that increase its effectiveness and imitation. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACBR-TX	AC BRILL - Assorted Colors -	€ 6.70

AC CACTUS CHENILLE 0.8MM

The Cactus Chenille 0.8 mm is the smallest Cactus made in the world, obtained through a particular manufacturing process that, despite the small diameter, allows for excellent retention of the effect fibers. It is suitable for all those patterns where an iridescent effect is necessary, but with very small dimensions, such as nymphs and wets flies. - Also available on spool and in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACCC08-TX	AC CACTUS CHENILLE 08 - Assorted Colors -	€ 6.70

AC CACTUS CHENILLE 10MM

The classic Cactus Chenille in the size of 10 mm, probably one of the most widespread and used synthetic materials in the world. The fly tying quality makes our Cactus easily usable with minimal fiber dispersion during use, making even the most difficult assemblies simple. Recommended for fly tyings of flies mainly for the stillwater, of medium to large sizes. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACCC10-TX	AC CACTUS CHENILLE 10 - Assorted Colors -	€ 6.70

AC CACTUS CHENILLE 15MM

The classic Cactus Chenille in size 15 mm, probably one of the most widespread and used synthetic materials in the world. The fly tying quality makes our Cactus easily usable and with minimal fiber dispersion during use, making even the most difficult assemblies simple. Recommended for constructing mainly large stillwater or sea flies. - Also available in the version packaged in a single card

CODE	DESCRIPTION	RETAIL PRICE
ACCC15-TX	AC CACTUS CHENILLE 15 - Assorted Colors -	€ 6.70

AC CACTUS CHENILLE 2MM

The Cactus Chenille 2 mm is obtained through a particular manufacturing process which, despite its small diameter, allows excellent retention of the effect fibers. It is suitable for all those patterns where it is necessary to have an iridescent effect, but with reduced dimensions, such as nymphs and wet flies. It maintains the peculiar characteristics of the Cactus Chenille 0.8 mm, but the slightly larger dimensions allow its use on hooks from #10 to #14, either for collars or thorax ribs on nymphs. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACCC2-TX	AC CACTUS CHENILLE 2 - Assorted Colors -	€ 6.70

AC CACTUS CHENILLE 6MM

The Cactus Chenille in the 6 mm size, probably one of the most widespread and used synthetic materials in the world. The fly tying quality makes our Cactus easily usable and with minimal fiber dispersal during use, making even the most difficult assemblies simple. Recommended in fly tyings mainly for stillwater fishing. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACCC6-TX	AC CACTUS CHENILLE 6 - Assorted Colors -	€ 6.70

AC CRYSTAL CACTUS 10MM

Variant of the classic Cactus, it is made by replacing the flat rainbow fibers with our Crystalflash fibers. We have obtained a very intense and iridescent effect, particularly in darker colors. Excellent for large wet flies and stillwater flies that require a different effect when wet compared to the original cactus chenille. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACCRCA-TX	AC CRYSTAL CACTUS 10 - Assorted Colors -	€ 6.70

AC CRYSTALFLASH MEDIUM

Mylar pearlescent twist, with a characteristic light effect. Perfect for streamers but can also be used for bodies, to give a touch of brilliance. Interesting also for tying nymphs and emergers, experimenting with it alone or mixing two or more colors together. For this use, we suggest pulling it lightly during fly tying in order to bring it back flat, as it was originally before twisting. A material widely used for creating light points in imitations such as shrimp for sea trout or bonefish, but also for classic clouser minnows. It is not as soft as other materials but guarantees hold and shine even when wet. - Also available in the single skein packaging

CODE	DESCRIPTION	RETAIL PRICE
ACCFM-TX	AC CRYSTALFLASH MD PEARL - Assorted Colors -	€ 6.70

AC CRYSTALFLASH SOLID

Twisted metallic Mylar, with vibrant colors and a characteristic light effect. Perfect for streamers but can also be used for body ribbing, to add a touch of brilliance. A material widely used for creating light spots in imitations such as shrimp for sea trout or bonefish, as well as for classic clouser minnows. It may not be as soft as other materials, but it guarantees durability and shine even when wet. - Also available in the single skein packaging

CODE	DESCRIPTION	RETAIL PRICE
ACCFS-TX	AC CRYSTALFLASH SOLID - Assorted Colors -	€ 6.70

AC FLAT CHENILLE 20MM

Very similar to the classic Cactus, it differs from it for the mainly sewn flat and quite sparse fibers. Thanks to its very thin core, it is easy to use. The arrangement of the fibers allows for a more orderly effect during wrapping and less invasive filling during palmering. The 20 mm size is suitable for medium-sized flies. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACFL20-TX	AC FLAT CHENILLE 20 - Assorted Colors -	€ 6.70

AC FLAT CHENILLE 40MM

Very similar to the classic Cactus, it differs from it by the mainly flat and quite sparse sewn fibers. Thanks to its very thin tying, it can be easily used. The arrangement of the fibers allows for a neater effect during wrapping and less invasive filling during palmering. The 40 mm size is suitable for large flies. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACFL40-TX	AC FLAT CHENILLE 40 - Assorted Colors -	€ 6.70

AC HOLOGRAPHIC FIBERS 1/69"

Flat film made with holographic effects created by laser. Recommended as thin ribbing to give brilliance and enhance natural materials. Perfect material for making small perdigon and chironomid flies, the color effect derived from holographic film is highly captivating. - Fibers are 0.37 mm wide (1/69" inches) - Also available in the single skein packaging

CODE	DESCRIPTION	RETAIL PRICE
ACHF69-TX	AC HOLOGRAPHIC FIBERS - Assorted Colors -	€ 6.70

AC ICE CHENILLE 10MM

Classic 10mm chenille. Made with transparent fibers, excellent for creating small stillwater streamers with a shiny look. Excellent for creating small stillwater streamers. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACIC10-TX	AC ICE CHENILLE 10 - Assorted Colors -	€ 6.70

AC ICE CHENILLE 6MM

Classic 6mm chenille made with only transparent fibers, great for making small streamers for stillwater fishing characterized by a shiny appearance. It is the smallest size and can also be used in larger nymphs. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACIC6-TX	AC ICE CHENILLE 6 - Assorted Colors -	€ 6.70

AC JUMBO CACTUS UV 30MM

The largest Cactus ever made. Its exceptional width of 30 millimeters makes it suitable for all those flies that require bulky yet lightweight bodies. In fact, the quantity of effect fibers is measured in order to obtain an ideal coverage of the pattern, without burdening the final weight. In this version, rainbow fibers are replaced by ultraviolet fibers to obtain new color reflections, optimized for large predators. Excellent for making streamers and central parts of tube flies when you want to achieve a particular effect with UV reflections. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACJC-TX	AC JUMBO CACTUS PEARL - Assorted Colors -	€ 6.70

AC LONG HAIR HOLO

The Long Hair Holo is made with only 30mm metallic fibers. It is available in tone-on-tone color variants, or mixed with ultraviolet or pearl fibers. The color effects satisfy any tyier needs. It is exceptional for making complete streamers or central parts of some. The main characteristics are speed of use, softness, and reflections, combined with resistance, making it a must-have for lovers of fishing for predators of any size, both in freshwater and saltwater. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACLHH-TX	AC LONG HAIR HOLO - Assorted Colors -	€ 6.70

AC LONG HAIR LARGE

The Long Hair Large of 30 mm. are exceptional for creating complete streamers or central parts of some of them. Speed of use, softness, and reflections are the main characteristics that, combined with resistance, make them a must for lovers of fishing for predators of any size, both in freshwater and saltwater. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACLHL-TX	AC LONG HAIR LG - Assorted Colors -	€ 6.70

AC LONG HAIR MEDIUM

The Long Hair Medium 15mm is exceptional for making complete streamers or central parts of them. Speed of use, softness, and reflections are the main characteristics that, combined with resistance, make it a must-have for predator fishing enthusiasts of any size, both in freshwater and saltwater. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACLHM-TX	AC LONG HAIR MD - Assorted Colors -	€ 6.70

AC METAL BRAID

Thin braid obtained by mixing two colors, both tone on tone and alternating with ultraviolet and rainbow fibers. The wide range of available colors allows you to always find the right color for your artificial bait. It can be frayed to reduce its size or used whole for medium-sized artificial bodies, such as nymphs and wet flies. Being very resistant, it does not require any subsequent coating with glue or resin. - Also available on spool and in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACMB-TX	AC METAL BRAID - Assorted Colors -	€ 6.70

AC METAL BRILL

Cut and sewn with 5 mm Rayon Viscose fibers, very sparse and mixed with transparent fibers. It is a very interesting material for tying nymphs and wet flies, giving a translucent effect to the bodies. Also excellent when combined with CDC thoraxes and soft hackle to increase its effectiveness and imitation. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACMBR-TX	AC METAL BRILL - Assorted Colors -	€ 6.70

AC MICROCHENILLE

The classic Microchenille was one of the first synthetic materials of textile origin, used in the fly fishing sector. Characterized by very short, sparse fibers without any iridescent or glossy effect, they are held in place by a special glued core. One of the basic products for all small natural-looking flies. Excellent for creating compact bodies and body extensions, also very effective for imitations aimed at alternative fly fishing. - Also available on spool and in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACMC-TX	AC MICROCHENILLE - Assorted Colors -	€ 6.70

AC MIXED HOLO CHENILLE

Variant of the classic Cactus proposed in the 10 mm version, it is made with a special blend of metallic fibers that produce particular light effects very similar to holographic. Excellent for streamers and artificial lures even for stillwater fishing that requires different light effects compared to the classic Mother of Pearl version. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACMHC-TX	AC MIXED HOLO CHENILLE - Assorted Colors -	€ 6.70

AC PEARL BRAID 2

Small-sized braid made from overdyed rainbow mylar, suggested for tying both full bodies and partial ribbing. It can also be unraveled, extracting the fibers composing the braid to obtain a flat Mylar for making wings or tails for small flies. To achieve interesting color variations, it can be wrapped over other base threads, producing multiple shades of color. - Also available on spool and in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACPB2-TX	AC PEARL BRAID 2 - Assorted Colors -	€ 6.70

AC PEARL BRAID 4

Medium-sized braid made from overdyed rainbow mylar, suggested for tying both full bodies and partial ribbing. It can also be unraveled, extracting the fibers composing the braid to obtain a flat Mylar for making wings or tails for small flies. To achieve interesting color variations, it can be wrapped over other base threads, producing multiple shades of color. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACPB4-TX	AC PEARL BRAID 4 - Assorted Colors -	€ 6.70

AC ROUND CHENILLE

Version of 2 mm diameter made of volumized polyester of the classic rayon viscose chenille. It is made with a particular manufacturing process and the use of technological materials that guarantee excellent fiber hold. Its particularly round and voluminous appearance facilitates the creation of perfectly regular and lightweight bodies. If you decide to use it as an extension in flies like worms, it is advisable to pay attention to preserving the integrity of the chenille tip to prevent it from fraying, through burning or gluing. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACRC-TX	AC ROUND CHENILLE - Assorted Colors -	€ 6.70

AC SUEDE CHENILLE

Very dense and perfectly round variant, designed and developed to create imitations with material not wrapped around the hook, such as San Juan worms. It is made with a special glued core that prevents fiber loss. It is recommended to burn one end with a lighter for a more realistic appearance of the worm. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACSUE-TX	AC SUEDE CHENILLE - Assorted Colors -	€ 6.70

AC WOLLY CHENILLE

Cut and sewn with thinly-distributed fibers of pure wool mixed with a transparent film. Perfect material for small, natural-looking imitations with a touch of brightness. Effective for quickly creating the bodies of small streamers with a natural and very durable look, even when combined with rabbit or marabou. - Also available in the single card packaged version

CODE	DESCRIPTION	RETAIL PRICE
ACWC-TX	AC WOLLY CHENILLE - Assorted Colors -	€ 6.70

BRASS BEAD COPPER

High-quality Brass Beads, ideal for tying nymphs and streamers on grub and straight hooks. They are a great compromise when you want to fish with a bead head fly without making it too heavy. The coloring is done using techniques that prevent fading during fishing action. Widely used in stillwater fishing, they also find their application in rivers and streams. - Color: Copper plated - Pack of 20 pieces

CODE	DESCRIPTION	RETAIL PRICE
PBBC-24	BRASS BEADS 2,4 mm. - Copper - 20 pcs.	€ 1.80

PTSBW-38	TUNGSTEN SLOTTED BEADS 3,8 mm. - White - 20 pcs.	€ 6.60

TUNGSTEN JAVI

High quality tungsten javi beads with the highest percentage of tungsten possible, for maximum weight in fishing relative to the diameter. This particular bead allows the nymph to work in reverse even if on a straight hook, practically transforming it into a jig hook. The coloring are made using techniques that prevent fading during fishing action. Recommended for use on straight and grub hooks. - Color: Plated Gold - Pack of 10 Javi

CODE	DESCRIPTION	RETAIL PRICE
PTJG-L	TUNGSTEN JAVI 3,6 x 9,0 mm. - Gold - 10 pcs.	€ 9.80
PTJG-M	TUNGSTEN JAVI 3,3 x 8,8 mm. - Gold - 10 pcs.	€ 7.10
PTJG-S	TUNGSTEN JAVI 2,8 X 6,9 mm. - Gold - 10 pcs.	€ 5.50
PTJG-XS	TUNGSTEN JAVI 2,3 X 6,1 mm. - Gold - 10 pcs.	€ 4.10

TUNGSTEN DROPS

Tungsten drops, designed to weight the body of the nymphs while maintaining their optimal shape. They are inserted like a bead and, thanks to the long cut along the length, they are easy to position. Sizes designed to match beads of the same size, also comply with international competition rules. The colorings are made using techniques that prevent fading during fishing action. Recommended for use on straight or grub hooks. - Color: Plated Silver - Pack of 10 Drops

CODE	DESCRIPTION	RETAIL PRICE
PTD-20	TUNGSTEN DROPS 2,0 mm. - Silver - 10 pcs.	€ 3.50
PTD-23	TUNGSTEN DROPS 2,3 mm. - Silver - 10 pcs.	€ 3.80
PTD-26	TUNGSTEN DROPS 2,6 mm. - Silver - 10 pcs.	€ 4.00
PTD-30	TUNGSTEN DROPS 3,0 mm. - Silver - 10 pcs.	€ 5.30
PTD-35	TUNGSTEN DROPS 3,5 mm. - Silver - 10 pcs.	€ 6.40

FLASH FLIES KIT LARGE

Made in Italy, the Flash Flies Kit Medium project was designed by Mauro Borselli with the manufacturing cooperation of Textreme. Mauro conducted countless fishing tests on many species of predators (both fresh and saltwater) and has been instrumental in working with us throughout the production process, from the fibers development, to the final packaging. The result is that tying effective, long- lasting streamers has never been so easy! When you need fast, effective, life- like dressings that are suitable for any type of predator, Flash Flies kits are the winning choice. This innovative dressing is accessible to everyone, as it combines tying simplicity (just follow the instructions on the back) with exceptional resistance to predator attacks. Thanks to the bespoke manufacturing process, the fibers are blocked at their base by a special double seam which gives them directionality and memory, and always return to their original position, either during the launch, swimming or after being into fish jaws. CHARACTERISTICS - Recommended hook 5/0 and 6/0 - Quick tying (approx one minute to complete the streamer) - Virtually indestructible to predator attacks - Ready to fish in seconds as it absorbs a lot of water - Easy to cast and very light, as it dries during the back cast - Fluid and realistic motion into the water - Thanks to its particular structure, it generates a lot of vibration in the water

CODE	DESCRIPTION	RETAIL PRICE

SPOOL KIT TRADITIONAL THREADS

SAVE 15% ON THE PURCHASE OF INDIVIDUAL ITEMS! Kit of Spools for tying traditional flies. These materials have made history in fly fishing and are still appreciated and used today in specific techniques (such as Valsesiana). An affordable solution for those who want to approach tying their first flies or do not know exactly which thread to choose. Composed of: - 6 Spools of Pure Wool (Colors 01-Light Gray, 07-Light Olive, 03-Sand, 10-Cinammon, 13-Dark Brown, 17-Deep Blue) - 6 Spools of Mohair (Colors 09-Rusty Brown, 17-Claret, 11-Brown, 13-Medium Olive, 07-Light Cahill, 06-Sand) - 6 Spools of Pure Silk (Colors 05-Tan, 07-Light Olive, 04-Gray, 16-Yellow, 15-Orange, 17-Lilac) - 1 Box 18 (transparent plastic box with 18 compartments, also usable for storing small items)

CODE	DESCRIPTION	RETAIL PRICE
KITTRADSP-TX	KIT TRADITIONAL SPOOLS - Assorted Colors - 18 Spools + Box18	€ 59.20

BASIC KIT FOR PERDIGONES

SAVE 15% ON THE PURCHASE OF INDIVIDUAL ITEMS! Basic components kit for tying Perdigones. Affordable solution for those who want to approach tying their first perdigones, the classic nymph of the Spanish school. Composed of: - 2 spools of Glitter Thread (Colors 09-Golden Brown and 06-Rust) - 2 spools of Holographic Fibers MD (Colors 04-Holo Red and 17-Holo Bronze) - 1 spool of Polyfloss (Color 02-Black) - 2 packets of Barbless Jig Hooks Dohiku (Size J-12 and J-14) - 2 packets of Tungsten slotted Beads color Silver (Size 2.8 and 3.3 mm.)

CODE	DESCRIPTION	RETAIL PRICE
KITPERDMIX-TX	KIT PERDIGONES MIX - Assorted Products - 18 Spools + Box18	€ 29.50

SPOOL KIT FOR PERDIGONES

SAVE 15% ON THE PURCHASE OF INDIVIDUAL ITEMS! Assorted Spool Kit designed to complement the Basic Kit for Perdigones fly tying. Affordable solution for those who want to approach tying their first perdigones, the classic nymph of the Spanish school. Composed of: - 6 Glitter Thread Spools (Colors 05-Lt.Brown, 07-Dk.Brown, 12-Red Rainbow, 15-Hot'Ciclamin, 23-Rainbow, 33-Golden Olive) - 6 Holographic Fibers MD Spools (Colors 15-Holo Orange, 13-Holo Pink, 02-Holo Silver, 01-Holo Gold, 10-Holo Turquoise, 06-Holo Purple) - 6 Polyfloss Spools (Colors 02-Black, 09-Brown, 01-White, 15-Olive, 29-Blood Red, 25-Violet) - 1 Box 18 (transparent plastic box with 18 compartments, also usable for storing small parts)

UNDER ZERO NYMPH LEADER BLACK

The Under Zero Nymph Leaders are the ultimate expression of technological innovation in the field of nymph leaders. They are made with an innovative mixture of Nylon and Fluorocarbon polymers and are externally coated with a highly abrasion-resistant layer for unparalleled smoothness through the rod guides. Three colors available, Fluo Yellow, Fluo Orange, and Black for excellent visual control during fishing while remaining practically invisible to fish, thanks to the outer fluorocarbon layer. Packaged in a practical, reusable transparent plastic spool containing 10 meters, they are offered in five sizes to meet all fishing needs, both for competitions and leisure. - 10 meter spool - Spooled in Italy - Level Leader for nymph and dropper fishing - Excellent sliding on the guides - Completely memory-free - Low elongation - High knot strength - Solid and permanent colors - Black color - Available diameters: 0.20 - 0.23 - Packaging dimensions: L163xW85xH23

3D PRINTING

We integrated a 3D printing department into our production facility in 2020, equipped with state-of-the-art machines and supported by a research and development area using professional CAD design software. The department was initially developed for the in-house production of point-of-sale display systems, such as Spool Clips and various countertop display models designed for the organization and presentation of our products. Over time, this activity has evolved into a cross-functional resource within the production system, also used for the development of technical components and functional solutions supporting manufacturing and operational management.

Today, the department plays an active role in both rapid prototyping and the production of functional parts for machinery and equipment, helping to ensure operational continuity and reduce potential production downtime through immediate technical interventions and solutions.

The entire development process, from prototype design to final validation, is managed entirely in-house at our facility. This allows full control over every stage, ensuring fast iteration cycles, design precision, and consistency between concept and final product.

The flexibility and speed of this technology make it possible to move in a very short time from an initial idea to a functional prototype, enabling a continuous optimization process that involves both technical and functional aspects.

Within this ecosystem are also the solutions developed for point-of-sale and product management, including systems related to the Spool Plan program, as well as fishing-focused platforms such as the FlyMate program, which includes a modular fly chest pack system with interchangeable cards and an ecosystem of sewn accessories designed for direct use in fishing.

BLENDMASTER CLAMP

CLAMP AND BASE TO FACILITATE THE MIXING OF DIFFERENT MATERIALS FOR USE IN DUBBING LOOPS "With this tool, I wanted to give all fly tyers, from the most to the least experienced, the possibility to easily mix materials of all kinds (hairs, feathers, and synthetics), and then insert them into a loop to form a cord. Free hands and a stable support surface make this operation even easier and more precise. And now... enjoy! Luca Barosselli" INSTRUCTIONS FOR USE: - Fully open the BlendMaster Clamp on a flat surface with the faces without prints facing upwards - Arrange the chosen materials for your dubbing loop in the desired quantity and order, between the two full faces of the clamp - Gently close the clamp by tipping the face with the inspection window toward the materials, resting it on top of them. - Adjust the quantity and length of the materials by pulling them through the window, or by reopening the clamp - Grip the base of the clap with one hand, lifting it off the table, and flip the last face underneath to form a closed unit - With an appropriate plier, clamp the obtained material mix and pull it out to insert it in the dubbing loop - Designed by Luca Barosselli - 100% Made in Italy - The orange color ensures optimal contrast even on natural-colored fibers - Always store the BlendMaster Clamp closed with the printed side up - If the hinges become stiff, lightly lubricate the hinge pivot points - Keep away from heat sources - Clamp sizes (fully extended): L16 x W8 cm - Packaging sizes: L180 x W70 x H13 cm

FLASH HOLDER

Clamp designed to facilitate the tying of flash and fibers in eyelets, designed for us by Eng. Guglielmo Todini. Optimized in every detail to obtain the maximum performance with a simple and clean design and a very high robustness, thanks to the type of plastic used. The special internal foam, as well as holding the fibers when the clamp is closed, also acts as a push spring to facilitate the opening by pressing on the release lever, after inserting the fibers in the loop. - Designed by Guglielmo Todini - 100% Made in Italy - Five colors available: Green - White - Red - Blue - Grey - Clamp total lenght: 117 mm. - Store away from direct heat sources - Do not store the clamp closed to maintain the elasticity of the foam - Adjust cross screw when necessary to maintain smooth movement - Packaging sizes: L180xW70xH13

EMPTY THREAD DISPLAY

(Empty Display – Spools Not Included) The Thread Display has been designed to provide a practical, organized, and elegant way to showcase Snap Spools. Manufactured from high-quality transparent acrylic, it has been developed to offer maximum ease of use, optimize display space, and enhance the full range of Snap Spool colors. It can accommodate up to 432 Snap Spools, arranged across four drawers, each featuring nine rows of twelve spools. The Thread Display can also be easily stacked on top of a second Thread Display, doubling its capacity. The two units are securely connected using four through-bolts, supplied with the display, providing a stable and reliable connection and allowing a total capacity of 864 Snap Spools. For maximum practicality, the display can be refilled from both the front and the rear, allowing it to be positioned either on a counter for easy access from both sides or against a wall, with rear access for replenishment. The new version is supplied unassembled to minimize shipping volume and ensure maximum protection against impacts and damage during transport. The package includes all necessary hardware for assembly and, if required, for stacking with an additional Thread Display. - External dimensions: 36 × 31 × H 41 cm - 4 drawers with 9 rows of 12 spools each - Total capacity: 432 Snap Spools

TOOL CADDY

The Tool Caddy is the new tabletop fly tying accessory, entirely produced by Textreme. It consists of a rotating base with four compartments, all equipped with special removable bridges, allowing you to store Uv glues upside down. It can hold from 3 up to 12 Uv adhesives or various other ly tying materials and accessories. The two rotating heads with holes of various sizes can be positioned at the desired height, thanks to the sectioned spacers. You can configure it with both heads mounted or just one at the top,for those who need to insert long tools that would interfere with the underlying head. It also comes with 10 hooks to insert into the external holes of the heads for hanging tools of particular shapes, such as hackle pliers, or simply keeping the most frequently used ones within easy reach. - Designed in collaboration with Paolo Cecconi - 100% Made in Italy - Rotating base with four compartments and removable bridges for UV glues - Rotating heads with holes ranging from 3 to 8 mm - 10 hooks for hanging additional accessories - Available in Black - Total height 25 cm. - Assembly instructions inside the package or scan the QR Code for the video - Internal core made of threaded steel bar - Made from renewable plant-based plastics

SUSTAINABILITY

In addition to our constant focus on product quality, we have developed a deep awareness of the environmental impact linked to our production.
Our approach begins with the selection of raw materials, based on criteria of quality, safety, and compliance with European regulations, with particular reference to REACH certification, which ensures the control of chemical substances throughout the entire production chain.
Special attention is dedicated to dyeing processes, developed according to low-impact methodologies with the aim of reducing the use of chemicals and water consumption. All dyes and processes used are REACH-compliant and managed by certified partners, selected to ensure color stability, repeatability, and safety, while also guaranteeing production efficiency and a responsible use of resources.
Packaging also follows this philosophy: where possible, it includes composition information to facilitate disposal, and our website provides a dedicated section to support end users in correct waste management according to local regulations.
Within this context, we also prioritize our suppliers, favoring partners located as close as possible to our production facility, in Italy and, when not possible, within the European Union. This approach helps reduce the overall logistical impact and strengthens a shorter, more efficient, and better-controlled supply chain.
Finally, we place particular attention on the management of production waste and scraps, through optimized technologies and procedures that reduce waste and improve process efficiency. All recyclable materials are sorted and disposed of in accordance with local municipal regulations, contributing to the protection of the ecosystem.
